[illegible]

Obtain the recurrence relation for the number of ways of arranging n letters in a line so that no letter is next to a letter of the same type.

$$\text{[illegible]}$$

$$\text{[illegible]}$$

$$\text{[illegible]}$$

Harmonic means Integer growth Item 1 The final inequality holds when $n \geq 4$. The second inequality follows from the fact that $\frac{1}{n+1} < \frac{1}{n}$ for all $n > 0$. Therefore, the inequality holds when $n \geq 4$.

ADS now uses th. Automated Dispatch System (ADS) for taking your service calls. This system offers many advantages over conventional call handling systems:

* **No Hold Time** - you never have to wait to hold to place an Automated Service Request!
* **Speed and Convenience** - you can place your call in about one minute - 24 hours a day / 7 days a week
* **Accuracy** - Your Service Technician hears your description of the problem in your voice
* **Fax Back Confirmation** - You may request a fax confirmation of your call with a confirmation number

Of course, you may speak to a live Dispatcher any time by pressing 0

Placing a call using our Automated Dispatch System

Have your Equipment **ID** Number ready

Call our service number at **(888) 888-8888**

1. When the Automated System answers, **press 2** to leave an Automated Service Request.

2. You will hear several prompts asking you to speak items such as Equipment ID, Company Name and Address, Contact Name and Phone Number, and a Detailed Service Message. Follow the prompts and press * after you have completed speaking each item.

3. Once you have completed your recordings, you have the option to **Listen, Append or Save** your message. Press 4 if you wish to save your message and continue.

4. You are then prompted to receive a Fax Confirmation. **Press 1 for YES / Press 2 for NO**
* If you choose **YES** - you are prompted for a fax area code and number
Use the buttons on your phone to enter your fax number, followed by the * key
* The system will speak your fax number back to you and ask for verification.

5. When you have completed these steps, the system will respond - "Information accepted" and return to the Dispatch Service Menu. You may hang up or choose other options if you wish.

Thank you for choosing

The Auditors Prayer

Dear Lord, Please let me take my leave
of this --- the audit shift;
I've been so good; I've done my work;
The phones I've answered swift;
I didn't pilfer breakfast-cakes,
Though no-ones here at all;
didn't strip down naked and go dancing
down the hall.
Dear Lord who watches kindly over
every damned hotel,
Please let the clerk come early who
releases me from Hell.

Braided Brunch Loaf

2 tablespoons unsalted butter
1 russet potato, peeled and cut into 1/2 inch cubes
1 small yellow onion, finely chopped
1 red bell pepper, seeded and diced into 1/4 inch
4 strips cooked bacon, chopped (or ham)
1 dozen eggs
2 scallions finely chopped
8 ounces cream cheese, cut into small pieces
1/2 cup shredded mild cheddar or Monterey jack cheese
1 egg white
1 teaspoon water
2 sheets frozen puff pastry, defrosted

INSTRUCTIONS

Heat oven to 375 degrees.

On high heat, melt butter and sauté potatoes for 5 minutes, or until they begin to soften. Add onion and pepper and cook 8 to 10 minutes, or until onion is cooked, flipping ingredients with a spatula every so often, being careful not to break up potato. Add bacon. Lower heat to medium.

In medium bowl, whisk together eggs and scallion. Add to sauté pan. Fold in cream cheese and cheddar and gently scramble until just set. Remove to a separate bowl and cool to room temperature (or refrigerate).

In a small bowl, whisk together egg white and water.

On a lightly floured work surface, roll one sheet of puff pastry into a 10-by-12-inch rectangle.

Place on a baking sheet lined with parchment or Silpat.

Trim pastry.

Place half of egg mixture into center of pastry and braid.

Brush with egg wash.

Repeat with other pastry sheet.

Bake 25 to 30 minutes, or until browned.

TRANSAMERICA
Retirement Solutions

Joint and Survivor Annuity Benefit Explanation

General

As a plan participant, you generally may elect to receive benefits when you reach your normal retirement age under the plan or terminate employment, provided your plan account has income in it available for your withdrawal. If your plan allows in-service withdrawals for hardship or upon your attainment of age 59 1/2 or for any other reason, you may also elect to receive benefit payments if you have satisfied the applicable plan requirements. If you are married on the date your benefit payments begin, you will be paid automatically in the form of a Joint and Survivor Annuity. This means that you will receive a monthly benefit for the rest of your life, and then after you die, your spouse, if living, will receive a monthly benefit for so long as he or she lives.

Your surviving spouse's monthly benefit must be at least half of, but not greater than, the monthly benefit you would have received. Receiving benefits in this form usually means that your monthly benefits will be less than what you would receive under other forms of benefit. The reason for this difference is that Joint and Survivor Annuity benefits are intended to be paid over two lifetimes (yours and your spouse's).

You may elect to receive benefits in a form other than a Joint and Survivor Annuity but your spouse must consent to his election, in writing, witnessed by a Notary Public. If you wish to designate a person other than your spouse as your beneficiary you must obtain your spouse's written consent to your beneficiary designation. It could date to the satisfaction of Transamerica that your spouse cannot be located, spousal consent is not required. Generally, your benefit election may be made and/or cancelled only during the 180 days before your benefit starting date. If you waive the Joint and Survivor Annuity, then cannot such waiver prior to the date that benefit payments begin, your benefit will be paid in the form of a Joint and Survivor Annuity pursuant to the provisions of the plan. If you properly waive the Joint and Survivor Annuity benefit, you may elect one of the forms of benefit indicated below.

If you are not married on the date your benefit payments begin, you will be paid automatically in the form of a Straight Life Annuity unless you elect a different form of benefit. Under a Straight Life Annuity you are paid a monthly benefit for your lifetime with no benefit payable upon your death.

Upon written request to Transamerica, you may obtain further information, including the approximate amounts payable under the Joint and Survivor Annuity and other forms of benefit available under the plan.

Under the provisions of the plan, you may, with your spouse's consent if you are married, request that your benefit be paid under the optional form of benefit which is best suited to your particular needs and circumstances. The amount of monthly income payable will depend upon the form of payment elected, your age (and your designated beneficiary's age) as well as your vested account balance in of your retirement date, or, if earlier, date of this election.

Summary of Forms of Benefit

Joint and Survivor Annuity—**Beneficiary is Surviving Spouse** A lifetime monthly income is payable to you, beginning on your benefit starting date and continuing until the last payment due before your death. If you are married on the date your benefit payments begin, upon your death your surviving spouse will (depending on the provisions of your employer's plan, receive a monthly income for life equal to at least one-half (and not more than 100%) of the amount of monthly income you were receiving.

Straight Life Annuity **No Years Certain** A lifetime monthly income is payable to you, beginning on your benefit starting date and continuing until the last payment due before your death. If you die after your benefit starting date, there will be no death benefit payable. If you are not married on the date benefits are to begin, payment will be made in this form unless you elect another form of benefit.

Fixed Period Certain Annuity **No Life** A monthly income is payable to you beginning on your benefit starting date, in equal installments over a specified period of not less than 60 nor more than 240 months. If you die during the specified period elected, the income will be continued for the remainder of the specified period to your designated beneficiary. You may elect that such payment to your beneficiary is to be made in a single sum.

Single Sum Payment: Instead of lifetime monthly income payments, the vested increase in your account will be paid in a single sum.

Installment Payment: Instead of lifetime monthly income payments the vested balance in your account will be paid in installment payments.

Partial Payment: Instead of lifetime monthly income payments, the vested balance in your account will be paid in partial payments.

CHASE FOR SPRINT CUP TO BEGIN AT CHICAGOLAND

2012 Chase lineup, following the Federated Auto Parts 400 at Richmond Int'l Raceway

1 Danny Gorrell's (finished fifth) 2,012 points

He led the most laps at Richmond but his bid for a third straight Sprint Cup victory didn't work out in the rain-delayed race at his home track. But his four regular-season race wins put him atop the standings after the points were reset heading into the 10 race championship leading Chase for the Sprint Cup.

2 Jimmie Johnson (finished 12th) 2,005 behind -7

Many in the sport consider him the favorite to win the Chase based on his five championships in the past six seasons, but he hasn't been dominant in recent weeks.

3 Tony Stewart (finished eighth) 2,005 behind -7

He rebounded at Richmond after lackluster performances of late, including one at Atlanta where he started on the pole but finished two laps off the pace.

4 Brad Keselowski (finished seventh) 2,005 behind -7

His consistency all season make him a strong contender for the title. In the past 10 races he's finished an average of 4.6 other than at Bristol, where he started third but was swept up in a crash.

5 Greg Biffle (finished ninth) 2,005 behind -7

He was the points leader before the standings were reset for the Chase, which proves that he's been the best se... for this

For Unemployment Use Only

Instructions

- Clearly print or type your name and Social Security number. Enter any additional name(s) or Social Security number(s) under which you may have worked.
- Enter the Federal Employer Identification Number (FEIN) from your W-2 form, if available.
- Clearly print or type employer name, address, telephone number and dates of employment.
- Mark the box in Item 8 if you never worked for or were PAID by the employer listed with the identified quarter(s) and request the wages not be used on your claim. There are penalties for withholding employment information.
- If you did work for the employer, report gross wages (before taxes) earned by you in each calendar quarter identified in Item 10 on front side. For example, you may have worked during the last week of March (1st quarter) but were not paid until April (2nd quarter). Report these wages in the 2nd quarter (the quarter containing the date you were PAID).

There are 4 calendar quarters per year.
The quarters are numbered and are the same from year to year.
Each quarter contains three calendar months as follows:

1st Quarter	January 1	through	March 31
2nd Quarter	April 1	through	June 30
3rd Quarter	July 1	through	September 30
4th Quarter	October 1	through	December 31

- If you know your gross wages for each quarter, complete only the Total Quarterly Wages box for each quarter identified in Item 10 or you may use the spaces provided to list each pay date and amount to help you figure the Total Quarterly Wages.
- If you did not work for or were not PAID by the employer listed during the identified quarters and request that the reported wages not be used, check box # 8.
- If you have pay stubs, enter the pay dates (date of check) and gross wages paid on that date in the correct quarter.
- Calendars are available upon request that show the 4 quarters. Call the UIA at the number below to request a calendar. A calendar (Form UIA1209) is also available on our website: www.michigan.gov/uia.
- If you need help, call UIA at 1-866-500-0017 (TTY customers use 1-866-366-0004).
- Carefully read the Certification statement on reverse side before you sign and date this form.

NOTE: If your claim is established based on the information you provide on this form, it may be subject to a redetermination when corrected wage information is obtained from your employer.

You offer a lifeline to mothers around the world to find new strength and hope **through prayer**

when you give

to Moms in Prayer International.

Tess found prayer, friendship and fellowship—"I could not shower or vacuum. There was no energy to invest in the kids. I was isolating myself. It was during that time last November after my mother passed away, that I began to understand the blessing and power of

to lunch. I only got out of bed because I couldn't say no to her. I was lost, but God knew how to find me in the weeks that followed, my friend's confident faith, quiet stability and nonjudgmental friendship was my support. One day I found myself praying earnestly and thanking God. At that moment, I realized I was back on firm ground. I attribute finding my way back to God to the blessings of Moms in Prayer: prayer, friendship and fellowship."—*Tess in Connecticut*

Chioma knows we must pray for our children's protection—"There is violence in parts of Northern Nigeria. Schools struggle to have supplies for the children. Nigerians are resilient, but jobs are hard to find. My kids are girls. Living in such trying times and knowing how vulnerable girls are, I worry. Each morning, when my girls are ready to leave for school, we hold hands and pray together.

One day by the leading of the Holy Spirit, I came across the Moms in Prayer International website. I signed up for daily prayers and the Lord made an impression on my heart, prompting me to join a group. It was as if God was saying, 'It is time to start this ministry!' I joined Moms in Prayer because I believe it's important to pray for our young children, that they will fear the Lord and not depart from His ways. There is violence all over the world and that is why as mothers, we must pray for the protection of our children wherever they live."
—*Chioma in Nigeria*

The power of prayer overcomes addiction—"We had a virus on our computer — and we never dreamt it would lead to the discovery that my son had been downloading pornography. We soon realized that our son was addicted. My husband and I were in anguish, but God is merciful! When I was very young, God blessed me with an understanding of the power of prayer. I knew that the only way to get my teenager back was to pray harder with an army of mothers.

4 Pose préliminaire des câbles

Toutes les applications et le câblage à destination ou en provenance de l'enceinte sont du Classe 2 basse tension ou Communication. Toutes les pratiques applicables au câblage doivent être respectées, telles que la séparation des câbles d'alimentation et de données comme décrit ci-dessus. La section suivante décrit l'installation préliminaire au câblage de l'enceinte.

A. Installation préliminaire du téléphone
1) Installer le câble de la catégorie voulue (selon l'application) entre l'enceinte et le dispositif d'interface du réseau de la compagnie de télécommunication. Faire passer le câble dans l'un des deux trous d'accès en haut à gauche, en laissant une longueur supplémentaire d'environ un mètre. Préparer le câble au niveau de l'entrée dans l'enceinte et à son extrémité.
2) Installer un câble de la catégorie voulue (selon l'application) entre l'enceinte et chaque prise de téléphone. Faire passer les câbles dans l'un des deux trous d'accès en haut à gauche, en laissant une longueur supplémentaire d'environ un mètre. Étiqueter les câbles au niveau de leur entrée dans l'enceinte et à leur extrémité.
3) Placer et fixer les câbles conformément aux règles et aux pratiques de câblage pour s'assurer qu'ils ne sont pas abîmés durant la construction.
REMARQUE Il est recommandé d'installer un second câble de catégorie 5 (Cat. 5) entre l'interface du réseau téléphonique et l'enceinte pour les applications futures.

B Installation préliminaire des câbles coaxiaux
1) Installer les câbles blindés Quad RG6 entre l'enceinte et les sorties vidéo. Faire passer les câbles dans l'un des deux trous d'accès en haut à droite, en laissant une longueur supplémentaire d'environ un mètre. Étiqueter les câbles près de leur entrée dans l'enceinte et à leur extrémité.
2) Installer deux (ou quatre) câbles blindés Quad RG6 entre l'enceinte et l'emplacement prévu de l'antenne à réflecteur. Faire passer les câbles dans l'un des deux trous d'accès en haut à droite, en laissant une longueur supplémentaire d'environ un mètre. Étiqueter les câbles près de leur entrée dans l'enceinte et à leur extrémité.
3) Installer un câble blindé Quad RG6 entre l'enceinte et l'entrée du centre des données et les câbles vidéo. Faire passer les câbles dans l'un des deux trous d'accès en haut à droite, en laissant une longueur supplémentaire d'environ un mètre. Étiqueter les câbles près de leur entrée dans l'enceinte et à leur extrémité.
4) Placer et fixer les câbles conformément aux règles et aux pratiques de câblage pour s'assurer qu'ils ne sont pas abîmés durant la construction

C. Installations préliminaires des autres câbles
1) Pour la câblage local (LAN) et les autres connexions de données, installer des câbles de catégorie 5e (Cat. 5e) entre l'enceinte et les câbles vidéo/mixte.
2) Pour les applications audio et haute-fidélité, installer le câble approprié selon les instructions de l'application.

D. Câblage de sécurité et de contrôle (si câblage de contrôle est un câblage basse tension pour contrôles d'éclairage et d'autres systèmes domotiques)
1) Installer les câbles de sécurité et de contrôle entre l'enceinte et les capteurs et dispositifs contrôlés. Faire passer les câbles dans les trous d'accès du dos en laissant une longueur supplémentaire d'environ un mètre. Étiqueter les câbles près de leur entrée dans l'enceinte et à leur extrémité.
Remarque : Consulter le guide d'installation du système de contrôle pour les câbles et le marquage.

E. Câble de terre de l'enceinte – *Figure 2*
Le câble de terre doit être installé entre l'enceinte et le système électrique de la maison. La vis de terre est située à l'intérieur au dos de l'enceinte

F. Prise double – *Figure 3*
(Pose préliminaire)
1) Ouvrir l'accès démontable en bas et à droite de l'enceinte.
2) Installer une boîte métallique homologuée UL avec une vis à tête.
3) Acheminer un câble NM (ß blindage non électrique) jusqu'à la boîte de la prise et fixer
(Finition)
4) Raccorder une prise double homologuée UL de 125 VCA et la fixer sur la boîte métallique.
5) Installer la plaque de couverture de la prise double

5 Pose du couvercle (après finition du mur)

A. Pour le montage en surface, ajuster au câblage la position de l'enceinte en desserrant les vis dans les brides de montage, puis repositionner les. Immobiliser en position en serrant que vis dans les trous oblongues et en centrant de chaque côté.
B. Fixer l'étiquette d'identification des câbles à l'intérieur du couvercle et inscrire les renseignements sur le câblage.
C. Aligner le couvercle sur les câbles (4) trous de vis tout en vérifiant qu'aucun câble n'est pincé ou à l'enceinte de l'enceinte.
D. Installer les quatre (4) vis du couvercle avec des rondelles dentelé dans les quatre coins du couvercle.

REMARQUE Les vis doivent être installées avec des rondelles-freins pour assurer une bonne mise à la terre du couvercle. Les vis et les rondelles-freins doivent être installées afin que le couvercle soit bien relié à la terre de l'enceinte. Voir *Figure 5*.

MFD FCOPY Test Use

The purpose of this procedure is to test an FCOPY enabled MFD

1) Create a Test Page in MS Word with the following Test Page for MFD Users to complete. Keep the test page format simple. The test will run on a single page. Use a page for each model to test. Insert the current MFD
2. Scan the FCOPY test page on a MFD touch screen. Ensure FCOPY with your MFD Device Name and Location is selected
3. Run the Test Page Macro and the Test Page (Step-1) to your MFD
4. Run a Scan To Mailbox and send the Test Page from Step-1 to your e-mail box
5) Use the Expense feature item in FCOPY to test several Test Page from Step-1 to the Expense Box.
6) Send the Test Page from Step-1 to International Mailbox 0x36. Please verify the image received matches the image sent. If the extension was successfully received, it will appear in the Inbox. If the image is not received, verify the image was sent successfully. If Faxing, make sure the phone number is correct and the fax machine is powered on. Please send the test fax to another nearby MFD
7) If all the test numbers have been tested one time, test for the most frequently used MFDs. Make sure to record the Test Page number below. If your MFD is not in the list, then the model is not tested. Rerun the test 10 times. If the Test fails, fax back
8) Send Inbox data from those MFDs that tested positive. If successful, the Inbox will be empty. If the fax failed, the image will remain in the Inbox. Please confirm that the fax is received at the receiving MFD by location. Please confirm that the fax is received at the receiving MFD by location. Please confirm that the fax is received at the receiving MFD by location.

Introduction

Welcome to ASIO4ALL v2! This manual enables you to make the most of your ASIO4ALL installation, especially as it comes to the advanced features newly introduced in this Version of ASIO4ALL.

In order to achieve the best possible results with ASIO4ALL, it is recommended that your computer is configured accordingly:

- **Set the power scheme to "Always On" (XP) or "High Performance" (Vista)** in order to turn off Processor P State switching! *Advanced: Modify an existing power scheme so as to not switch CPU speed because other power settings are not that critical.*
- **Turn off system sounds!** While e.g. the Windows logon sound certainly will not be a problem, sound effects in response to button clicks, notifications etc. will mean that for the time they play, ASIO4ALL may be unable to emulate the audio device.

For updates, help and further information, please visit:

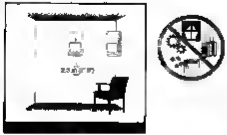
DT-7435/7435C DUAL TEC® Motion Sensor Installation Instructions

❶ Select the mounting location



Mounting Location Guidelines

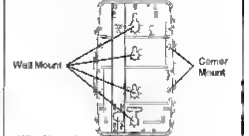
- 2.3 m (7'6") mounting height
- Avoid direct or reflected sunlight
- Aim sensor away from windows or heating/cooling devices
- Sensor must have a clear line-of-sight to protected area
- **See Special Instructions for pet applications**

❷ Separate the sensor housings and remove the printed circuit board (PCB)

Remove lock-down mask for non-pet applications; select the most appropriate lens for the application (see Special Instruction Sheet on the next page)

- Use a small screwdriver to unfasten the housing latch. Gently pull apart the housings
- Push outward on the PCB latch and lift the PCB out of the housing

❸ Mount the unit.



- Slide the wire through the wire channel and wire access in the back housing
- Mount the back housing flat against a wall or in a corner
- Replace the PCB

❹ Wire the unit.

Tamper 50 mA 24 VDC
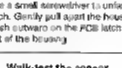
Alarm 110 mA 35 VDC
Power 35 mA 7.5-16 VDC (for UL 5.5-16 VDC)
T T NO C COM NC W W

Connect wires as shown using 0.3 - 1.0 mm² (18 to 22 gauge) wire size. Observe proper polarity

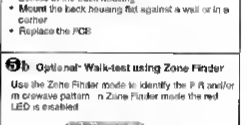
❺a Walk-test the sensor



- Use Switch 3 to select the appropriate fluorescent light filter (see Dip Switch Settings chart on the next page)
- Apply power to the unit. Initialization is complete when the LED stops flashing slowly. Select the appropriate sensitivity setting (see the Selected Instruction Notes on the next page.)
- Adjust the microwave range to minimum setting (25%) by turning the range adjustment counterclockwise using a small screwdriver
- Replace the front housing
- Begin walking through the detection area. The LED will turn on indicating an alarm detection
- Increase the microwave range as necessary
- Repeat the Sense-a step-5a until proper detection range is obtained

❺b Optional: Walk-test using Zone Finder

Use the Zone Finder mode to identify the PIR and/or microwave pattern. In Zone Finder mode the red LED is enabled



- Apply a screwdriver for five seconds to short the test pads.
- During the Zone Finder walk-test mode, the LED turns
  - green for PIR detection
  - yellow for microwave detection
- Adjust the microwave range as necessary.
- Zone finder mode times out after ten minutes.

About Social Security and Medicare...

Social Security pays retirement, disability family and survivors benefits. Medicare, a separate program run by the Centers for Medicare & Medicaid Services, helps pay for inpatient hospital care, nursing care doctors' fees, drugs and other medical services and supplies to people age 65 and older as well as to people who have been receiving Social Security disability benefits for two years or more. Medicare does not pay for long-term care so you may want to consider options for private insurance. Your Social Security covered earnings qualify you for both programs. For more information about Medicare, visit *www.medicare.gov* or call 1-800-633-4227 (TTY 1-877-486-2048) if you are deaf or hard of hearing.

Retirement — If you were born before 1938, you full retirement age is 65. Because of a 1983 change in the law the full retirement age will increase gradually to 67 for people born in 1960 and later.

Some people retire before their full retirement age. You can retire as early as 62 and take benefits in a reduced rate. If you work after your full retirement age, you can receive higher benefits because of additional earnings and credits for delayed retirement.

Disability — If you become disabled before full retirement age, you can receive disability benefits after six months if you have:

- enough credits from earnings (depending on your age you must have earned six to 20 of your credits in the three to 10 years before you became disabled), and
- a physical or mental impairment that is expected to prevent you from doing "substantial" work for a year or more or result in death.

If you are filing for disability benefits, please let us know if you are on active military duty or are a recently discharged veteran, so that we can handle your claim more quickly.

Family — If you're eligible for disability or retirement benefits, your current or divorced spouse, minor children or adult children disabled before age 22 also may receive benefits. Each may qualify for up to about 50 percent of your benefit amount.

Survivors — When you die, certain members of your family may be eligible for benefits:

- your spouse age 60 or older (50 or older if disabled, or any age if caring for your children younger than age 16); and
- your children if unmarried and younger than age 18, still in school and younger than 19 years old or adult children disabled before age 22.

If you are divorced, your ex-spouse could be eligible for a widow's or widower's benefit on your record when you die.

Extra Help with Medicare — If you know someone who is on Medicare and has limited income and resources, extra help is available for prescription drug costs. The extra help can help pay the monthly premiums, annual deductibles and prescription co-payments. To learn more or to apply, visit *www.socialsecurity.gov* or call **1-800-772-1213** (TTY **1-800-325-0778**).

Receive benefits and still work...

You can work and still get retirement or survivors benefits. If you're younger than your full retirement age, there are limits on how much you can earn without affecting your benefit amount. When you apply for benefits, we'll tell you what the limits are and whether work would affect your monthly benefits. When you reach full retirement age, the earnings limits no longer apply.

Before you decide to retire...

Carefully consider the advantages and disadvantages of early retirement. If you choose to receive benefits before you reach full retirement age, your monthly benefits will be reduced.

To help you decide the best time to retire, we offer a free publication *What To Start Receiving Retirement Benefits* (Publication No. 05-10147) that details the many factors you should consider before applying. Most people can receive an estimate of their benefits based on their actual Social Security earnings record by going to *www.socialsecurity.gov/estimator*. You also can calculate future retirement benefits by using the Social Security Benefit Calculators at *www.socialsecurity.gov*.

Other helpful free publications include:

- *Retirement Benefits* (No. 05-10035)
- *Understanding The Benefits* (No. 05-10024)
- *Your Retirement Benefit: How It Is Figured* (No. 05-10070)
- *Windfall Elimination Provision* (No. 05-10045)
- *Government Pension Offset* (No. 05-10007)
- *Identity Theft And Your Social Security Number* (No. 05-10064)

We also have other leaflets and fact sheets with information about specific topics such as military service, self-employment or foreign employment. You can request Social Security publications at our website, *www.socialsecurity.gov*, or by calling us at 1-800-772-1213. Our website has a list of frequently asked questions that may answer questions you have. We have easy-to-use online applications for benefits that can save you a telephone call or a trip to a field office.

You may also qualify for government benefits outside of Social Security. For more information on these benefits visit *www.govbenefits.gov*.

If you need more information— Visit *www.socialsecurity.gov/mystatement* on the Internet, contact any Social Security office, call **1-800-772-1213** or write to Social Security Administration, Office of Earnings Operations, P.O. Box 33676, Baltimore, MD 21290-3676. If you're deaf or hard of hearing, call TTY **1-800-325-0778**. If you have questions about your personal information you must provide your complete Social Security number. If your address is incorrect on this Statement, ask the Internal Revenue Service to send you a Form 8822. We don't keep your address if you're not receiving Social Security benefits.

To the right are pages that folks have faxed us recently. Click any thumbnail to see the large version and rate it for interestingness

You can fax something interesting to 1-888-877-1655 (your boss will never notice -- maybe) or 1-503 200-1300 (long distance to Portland, Oregon) and it should appear here within a couple of minutes. (It's a toll-free number if you're in the USA.) Keep it clean & legal.

Fax single-page documents with no cover sheet. If you fax more than one page, only the last page will appear here. We try to snip off the top few pixels of the page where your company name and fax number should appear, but make no promises that this will actually work.

QUINTA DE VARGELLAS VINTAGE

In certain years when a classic Taylor Vintage Port is not made, the firm may decide to release 'single quinta' Vintage Ports from its individual properties. Unlike the classic Taylor Vintages, which are blended from the wines of more than one estate, 'single quinta' Vintage Ports are made from the produce of only one property. They are made in years which produce relatively approachable, early maturing wines. Although they have the ability to age in bottle, they can be enjoyed when still quite young.

The first Quinta de Vargellas Vintage Port to be made generally available was the 1958. Since then Vargellas Vintage Ports have acquired a reputation which exceeds that of many other shippers' classic vintages.

Quinta de Vargellas Vintage Ports express the distinctive character of this famous property whose wines have been prized and sought after since the 1820s and which is regarded today as one of the world's finest wine estates. Vargellas Vintage Ports are recognisable for their distinctive violet-like scent, for their fine complex fruit and their firm linear tannins.

Unlike the classic Taylor Vintage Ports, whose very high scores and ratings together with their attractiveness to collectors and investors mean that they are relatively highly priced Vargellas Vintage Ports have remained very affordable, representing exceptional value.

Testing Your HP Fax Machine with the HP Fax Test Service

Support Home

Introduction

This document will assist you in testing your HP Fax machine using the HP Fax Test Service.

Print this document for easy reference by clicking the **Printable Version** link in the upper right corner of this page.

Test your fax machine

To test the capability of your fax machine, follow the directions below.

NOTE: Be sure that your phone number is not Caller ID blocked by your telephone company prior to attempting to send and receive a fax. Pressing *82 before dialing the toll free number will unblock the Caller ID blocking feature in most areas. Other phone company services can prevent you from receiving a fax, including voice mail, call blocking, or call privacy features.

NOTE: Whenever troubleshooting a fax issue, it is good practice to set the *Automatic Reports* option to *Every Error* before attempting a test fax. This way, even if the test fax fails, an error report will be generated that will guide you in future troubleshooting. This option is available on different panels on different products, consult the supply User's Guide for specific steps.

1. Send a one page blank and white test fax to 1-888-hptfaxts (1-888-473-8297).
2. When your fax is received by the HP Test Fax Service, we will generate a return fax to you within five minutes containing that we received your fax. This verifies that you can both send and receive a fax with your fax machine.

If you do not receive a return fax within 5-7 minutes, there may be a problem with the setup of your fax machine. Consult the user manual that came with the product for proper setup and configuration.

NOTE: The most common cause of failure is that the fax number set in the Fax Header on the machine does not match the number of the phone line connected to the fax. Also, ensure that the fax has per manufacturers the full 10-digit telephone number of the fax machine, including the area code.

For more information or assistance, click **Contact HP** at the top of this page.

hewlett-packard limited global warranty statement

extent of limited warranty

Hewlett-Packard ("HP") warrants to the end-user customer ("Customer") that each HP officejet 6100 Series product ("Product"), including related software, accessories, media, and supplies, shall be free from defects in material and workmanship for the duration, which begins on the date of purchase by the Customer.

For each hardware Product, the duration of HP's limited warranty is one year for parts and one year for labor. For all other Products, the duration of HP's limited warranty for both parts and labor is ninety days.

For each software Product, HP's limited warranty applies only to a failure to execute programming instructions. HP does not warrant that the operation of any Product shall be uninterrupted or error free.

HP's limited warranty covers only those defects which arise as a result of normal use of a Product, and does not cover any other problems, including those which arise as a result of (a) improper maintenance or modification, (b) software, accessories, media, or supplies not provided or supported by HP, or (c) operation outside the Product's specifications.

For any hardware Product, the use of a non-HP print cartridge or a refilled print cartridge does not affect either the warranty to the Customer or any HP support contract with the Customer. However, if Product failure or damage is attributable to the use of a non-HP or refilled print cartridge, HP shall charge its standard labor and materials charges to service the Product for the failure or damage.

If HP receives, during the applicable warranty period, notice of a defect in any Product, HP shall either repair or replace the defective Product, at HP's option. Where labor charges are not covered by HP's limited warranty, repairs shall be at HP's standard charges for labor.

If HP is unable to repair or replace, as applicable, a defective Product which is covered by HP's warranty, HP shall, within a reasonable time after being notified of the defect, refund the purchase price for the Product.

HP shall have no obligation to repair, replace, or refund until the Customer returns the defective Product to HP.

Any replacement product may be either new or like-new, provided that it has functionality at least equal to that of the Product being replaced.

HP products, including each Product, may contain remanufactured parts, components, or materials equivalent to new in performance.

HP's limited warranty for each Product is valid in any country/region or locality where HP has a support presence for the Product and where HP has marketed the Product. The level of warranty service may vary according to local

Yet another source of uncertainty is both the data aggregation and the transmission processes. When we are trying to predict a trajectory, it is sometimes possible to see outliers, suddenly locating the vessel [illegible] malfunctioning. This is the malfunction of the vessel's system or data transmission. It is to be noted that such conditions are a factor here). We cannot expect to [illegible] and it should be taken for granted that corrupt data streams are going to be fed to the system.

These sources of data uncertainty are more or less obvious. What is less obvious is another [illegible] is equipped with a [illegible] and [illegible] is the case where we have certain [illegible] projecting in the future vessel trajectories and determining whether these future trajectories [illegible] Box 2799 [illegible] Whitehorse, Yukon [illegible] Y1A 2C6

Within the port context, this behavior should be considered [illegible] (speed, time etc.) should be changed so that a warning is produced only when there "really" is a danger given the port conditions. But imagine another scenario. In which two vessels away from any ports this time, are indeed on a "collision" course. But they have actually agreed beforehand to meet (e.g., for an inspection). Another case of a false projected collision is a res[illegible]on

DO WE WANT TO KEEP ADDING PATTERNS TO A SYSTEM?

Pattern Refinement

One solution to the problem of [illegible] behaviors satisfying a pattern might be simply to refine the patterns in order to capture all the possible cases. However, there are two problems with this approach.

First, such an ad nauseam pattern refinement might not even be feasible, since we might lack the necessary knowledge, especially at the early stages of system deployment.

Second, the question remains whether we want to keep adding patterns to the system for every possible case, given the performance penalty they might incur. Early detection of a behavior based on a possibly not complete pattern, could be preferable to a near perfect but delayed (and therefora po[illegible] especially for critical situations (this is the case of "better safe than sorry").

Testing Your HP Fax Machine with the HP Fax Test Service

Introduction

This document will explain how you can test your HP Fax machine using the HP Fax Test Service.

By the end of this document, you will be able to do the following:

- Test your fax machine

1. Before starting, if you have any of the following, follow the steps in the table:

NOTE: If you have your fax machine connected to a DSL line, you must disable any voice capability on the DSL line before you can successfully send and receive faxes. For more information, see the documentation that came with your DSL service.	
NOTE: Whenever troubleshooting a fax issue, it is a good practice to verify the functionality of the phone line by using a standard telephone. If you cannot send or receive voice calls on the phone line, contact your telephone company for assistance.	

Are you using the HP Fax Test Service for the first time? If so, you will be prompted to enter your country/region, and then you will be asked to enter your fax number. Enter your fax number, including the area code, and then click **Next**.

When you have entered your fax number, the HP Fax Test Service will send a fax to your fax machine. You should receive a fax that includes a test page. If you do not receive a fax, see the troubleshooting information in step 3.

2. If you do receive a fax: In the HP Fax Test Service, you will be prompted to enter the date of the fax you received. Enter the date, and then click **Next**. On the next page, click **Finish**.

3. If you do not receive a fax: Review the following table for possible causes and solutions. Then, click **Next** to send another test fax.

NOTE: The most common cause of failure is that the fax machine is not connected to the telephone line correctly. Make sure that the telephone cord is connected to the fax machine and to the telephone wall jack. Also, make sure that the telephone line is working properly. To do this, disconnect the fax machine from the telephone line, and then use a standard telephone to make a voice call. If you cannot make a voice call, contact your telephone company for assistance.	

4. If you receive a fax: Click **Next**. The HP Fax Test Service will display a message indicating that your fax machine is working correctly. Click **Finish** to exit the HP Fax Test Service.

Fax something interesting toll free to 1 855 330 1240 or 1 213 294 2943

To the right are pages that folks have faxed us recently. Click any thumbnail to see the large version and read the interestingness

You can fax something interesting to 1-855-330-1240 (your boss will never notice the area code) or 213 294 2943 (long distance to Los Angeles, California) and it should appear here within a couple of minutes. (It's a toll-free number if you're in the USA.) How it works is legal.

Fax single-page documents with no cover sheet. If you fax more than one page, only the last page will appear here. We try to snip off the top few pixels of the page where your company name and fax number should appear, but make no guarantees that this will actually work.

Privacy policy: We hate spam and junk faxes, and will absolutely not send you any unsolicited e-mail or faxes. We won't share your information with marketers or anyone else.

9:30AM Meeting Agenda

1 message

Yelena Grinberg <yelena@crowdflower.com> Sun, Jan 31, 2010 at 3:11 PM
To: tom@crowdflower.com

Tom,

I'd like to officially welcome you aboard our great little big company. I think you'll really enjoy it here. With that said, let's get right to business.

Here's our 9:30AM meeting agenda

- Introductions/office tour
- Setting you up with a desk and supplies. We don't have a computer for you a ready, so your day will most likely involve a trip to the Apple store, if you don't mind that.
- Contract overview/signature
- Going over responsibilities and upcoming company events
- Briefing of Luke's upcoming trip to France/London/Amsterdam
  - Additional tickets
  - Phone
  - Receipts
- Operational needs
- Miscellaneous

See you tomorrow :)

<< WLAN report >>

Connection : Failed (Error : TS-02)

Communication Failed

Make sure that the WLAN access point/router is powered on.
- Move your machine to an obstructing-free area or closer to the WLAN access point/router.
- Temporarily place your machine within about one meter (3.3 ft) from the WLAN access point when you are configuring the WLAN settings.
- If your WLAN access point/router is using MAC address filtering, confirm the MAC address of the Brother machine is allowed in the filter.

2 If you manually entered the SSID and security information(SSID/authentication method/encryption method/Network Key) the information may be incorrect. Reconfirm the SSID and security information and reenter the correct information as necessary.

Now to confirm wireless security information(SSID/authentication method/encryption method/Network Key)
1) The default security settings may be provided on a label attached to the WLAN access point/router. Or the manufacturer's name or model or of the WLAN access point/router may be used as the default security settings.
2) See the documentation provided with your WLAN access point/router for information on how to find the security settings.

- If WLAN access point/router is set to not broadcast the SSID, the SSID will not automatically be detected. You will have to manually enter the SSID name.
- The Network key may also be described as the Password, Security Key or Encryption Key.

If you do not know the SSID and wireless security settings of your WLAN access point/router or how to change the configuration, see the documentation provided with your WLAN access point/router, ask the manufacturer of your access point/router or ask to your Internet provider or network administrator.

were you have to respect your elders. The last thing I do when I wake up in the morning is go to my parents and say good morning, that the way I was raised and I still do it. Many other people don't do that which is kind of amazing to them when I do it.

Focused Hearing talks about how we should be able to identify and distinguish between what we hear, the more we are attentive, the better result we get. Reflective Vision or Mirroring talks about how student can get from each other's experience, and by sharing, everybody is affected one way or the other. Scared Silence talk about how we people react to silence in different ways. Personally, silence gives me the time to digest and access the question or situation, and helps me come up with a better answer or reaction.

...part...ion may then be formatted...

...the way that two or more logical DOS ...

...disk.

Right. I suppose, but this is somewhat hypothetical. ... examples of systems, so show you how ...

Single Partition Windows PC ...one extended partition, and one ... would be a single FAT primary ... other three slots for partitions ...

Multiple Partition Windows PC ... a DOS-Windows system. The primary partition ... DOS partition. Within the extended partition ... other drives. Windows would be the first primary partition and the other two (D: and E:) would be logical volumes that were defined DOS volumes.

Multiple Operating System PC ... each with multiple operating systems. For example, you might have a primary DOS partition, an extended DOS partition, and a third partition. Each of these are file systems that the computer thinks are completely separate. Within the extended DOS partition, there are two logical volumes that the computer thinks are completely separate.

The extended DOS partition creates a sort of the overhead in order to give part of those existing to new DOS/Windows PCs. It really functions as a "container" that holds all DOS partitions except for the first (primary) volume. The notion that it's a container was used to fit the original design, which ... a set of two partitions, was too restrictive. The extended DOS partition system allows you to have up to 24 disk partitions in a single system, without violating compatibility with older hardware and software designed based on the original four-partition table. Of course nobody would use this many partitions in a system in most cases, because it would be a little organizationally ...

Within the expanded DOS partition, the logical drives are stored in a linked structure. The extended partition's information is contained in the master partition table (since the extended partition is one of the four partitions stored in the master boot record). It contains a field for an *extended partition table* that describes the first logical partition for the disk. That table contains information about that first logical partition, and a link to the next extended partition table which does, since the second logical partition on the disk, and so on. The extended partition tables are linked in a chain starting from the master partition table.

...terms of how the disk ... is used, there are only two main differences between a primary and a logical partition or volume. The first is that a primary partition can be set ... which is a logical concept. The second is that ... has ... different ... primary and logical ...

Virginia529 College Savings Plan

Welcome to the Virginia529 inVEST™ Program

Congratulations on enrolling in Virginia529 inVEST, formerly Virginia Education Savings Trust (VEST)! We look forward to working with you in the coming years to assist you in achieving your higher education savings goals.

Enclosed you will find a Confirmation Notice, including your account number, portfolio selection and contribution information. Please note that the "Contributions Received" amount indicated on this confirmation does not include the funds posted after the date of this notice or funds requested via one-time bank draft at the time you opened your account online. If the enclosed Confirmation Notice does not accurately reflect the selections you made on your Application, please notify us immediately by calling our toll-free number 1-888-567-0540, option 1. If you enrolled online, please be sure to sign and return the enclosed Acceptance Form.

You can access your account any time by visiting Virginia529.com and clicking on "My Account". Please protect your login information in order to prevent unauthorized access to your account.

Making contributions to your inVEST account is convenient and easy. There are several ways to make a contribution:

Automatic (ACH) Withdrawals: Establish monthly or bi-monthly automatic withdrawals from your checking or savings account by logging into your account online and selecting "Make a Payment". You may also download an ACH form from Virginia529.com and fax or mail it to our office.

One-time Bank Debit: At any time, you may log in to your account online and make a one-time contribution by clicking "Make a Payment".

Payroll Deduction. Check with your employer to see if payroll deduction is available. If your employer is currently not participating in payroll deduction but is interested in making this an option, please have them contact our office.

Mailing Your Payment: You may choose to mail your payment with an account coupon. You may request contribution coupons by logging into your account at Virginia529.com and selecting "Material Request" or by contacting our office.

You will receive quarterly statements reflecting account activity (contributions and distributions) and the market value of your account at the close of each calendar quarter.

Thank you for your participation in Virginia529™. Please contact us toll-free at 1-888-567-0540 or by email at customerservice@virginia529.com with any questions.

Virginia529 has made recent changes to select program names. Virginia Prepaid Education Program™ (VPEP™) is now Virginia529 prePAID™ and Virginia Education Savings Trust™ (VEST™) is now Virginia529 inVEST™. Please visit Virginia529.com for additional information.

Testing Your HP Fax Machine with the HP Fax Test Service

Introduction

This document will assist you in testing your HP Fax machine using the HP Fax Test Service.

Print this Autoverify for easy reference by clicking the Printable version link in the upper right corner of this page.

Test your fax machine

To test the capability of your fax machine, follow the directions while

NOTE: Be sure test your phone number is not Caller ID blocked by your telephone company prior to attempting to send test, receive a fax. Pressing *82 before places the call has number will unblock the Caller ID blocking feature in most areas. Other places company blocked can blocked you from receiving a fax including voice mail, forwarding, or call privacy features.

NOTE: Whenever troubleshooting a fax issue, it is page possible to set the Autoverify Reports option to Only Error before attempting a test fax. This way, only if the test fax fails, an error sheet with the generated test will guide you in future troubleshooting. The option is available in different places on different products, consult the product User's Guide for specific steps.

1. Have a one page (text only) white test fax to 1-888-systemone (1-888-473-2663).
2. When your fax is received by the HP Test Fax Service we will generate a return fax to you within few minutes confirming test we received your fax. This received test you can both send and receive a fax with your fax machine.

If you do not receive a return fax within 5-7 business days may be a problem with the setup of your fax machine. Consult the user manual that came with the product for proper setup and configuration.

NOTE: The most common cause of failure is that the fax number set in the Fax receive on the machine does not match the number of the phone line connected to the fax. Also, ensure that the fax receive contains the full 10-digit telephone number of the fax machine, including the area code.

For more information or assistance, click Contact HP at the top of this page.

Windows® Fax and Scan

One place to scan and fax your documents

FAX You can send and receive faxed documents on your computer without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started:

1. Connect a phone line to your computer.

   If your computer needs an external modem, connect the phone to the modem, and then connect the modem to your computer.

2. On the toolbar, click **New Fax.**

3. Follow the instructions in the setup wizard to connect to a fax modem, and then, when you're finished, create your fax.

To connect to a fax server instead of a modem, contact your system administrator. For more help with faxing, click the **Help** button on the toolbar.

SCAN After you add a scanner to your computer, you can preview documents or pictures before you scan them, and then adjust your scan settings for better results. You

Welcome to

Windows® Fax and Scan

One place to scan and fax your documents

FAX: You can send and receive faxed documents on your computer without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started:

1. Connect a phone line to your computer.

   If your computer needs an external modem, connect the phone to the modem, and then connect the modem to your computer.

2. On the toolbar, click **New Fax**.

3. Follow the instructions in the setup wizard to connect to a fax modem, and then, when you're finished, create your fax.

To connect to a fax server instead of a modem, contact your system administrator. For more help with faxing, click the **Help** button on the toolbar.

SCAN: After you add a scanner to your computer, you can preview documents or pictures before you scan them, and then adjust your scan settings for better results. You can also fax or e-mail scanned files to someone else.

To get started:

1. Connect your scanner to your computer by following the instructions that came with your scanner, and then place a document or picture on the scanner.

2. In Windows Fax and Scan, at the bottom of the left pane, click **Scan**.

3. On the toolbar, click **New Scan**.

4. Choose the scan settings you want to use, and you're ready to scan.

Use the options on the toolbar to fax, e-mail, print, or copy scans at any time. For more help with scanning, click the **Help** button on the toolbar.

TEXT

Doamne, astazi vin in Fata Ta sa ma inchin
Ca sa fiu umplut cu har divin.
In lumina Ta, as vrea mai mult sa imi cunosc
Slahiciunile si sa cresc in iubirea Ta.

Ref:
Cheama-ma si voi veni la Tine.
Cand sunt slab,Te rog Tu sa ma sprijunesti.
Ca vulturul spre cer ma voi inalta
Si vesnic voi trai, mereu voi locui in iubirea Ta.

Doamne, vreau sa fiu in stare sa-nteleg cum esti
Si care-i calea Ta ca sa merg pe ea.
Si din pacea Ta,in suflet sa-mi reversi un strop
Ca cei din jur sa bea si sa stea in iubirea Ta.

Testing Your HP Fax Machine with the HP Fax Test Service

Introduction

This document will assist you in testing your HP Fax machine using the HP Fax Test Service. Print this document for easy reference by clicking the **Printable Version** link in the menu right corner of this page.

Test your fax machine

To test the capability of your fax machine, follow the directions below.

NOTA:Be sure that your phone number is not Caller ID blocked by your telephone company prior to attempting to send and receive a fax. Pressing *82 before dialing the toll free number will unblock the Caller ID blocking feature. Please contact your phone company for services that can prevent you from receiving a fax, including voice mail, call blocking, or call privacy features.

NOTA:Whenever troubleshooting a fax issue, it is good practice to set the Automatic Reports option to **Every Error** before attempting a fax. This way, even if the sent fax fails, an error code will be generated that will guide you in future troubleshooting. This option is available in different places on different products, consult the product User's Guide for specific steps.

1. Send a one page blank and white test fax to **1-866-fxhome** (1-866-473-2663).
2. When your fax is received by the HP Test Fax Service, we will generate a return fax to your within five minutes confirming that we received your fax. This verifies that you can both send and receive a fax with your fax machine.

If you do not receive a return fax within 5-7 minutes, there may be a problem with the setup of your fax machine. Consult the user manual that came with the product for proper setup and configuration.

NOTA:The most common cause of failure is that the fax number set in the Fax Header on the machine does not match the number of the phone line connected to the fax. Also, ensure that you have entered the 10-digit telephone number of the fax machine, including the area code.

For more information or assistance, click **Contact HP** at the top of this page.

Peripheral T-Cell Lymphoma With Distinct Perifollicular Growth Pattern

A Distinct Subtype of T-Cell Lymphoma?

T Rödger, M.D., R. Ichinohasama, M.D., M M Ott, M.D., S Müller Deubert, Ph.D., I Miura, M.D., G Ott, M.D., and H K. Müller-Hermelink, M.D

Nine cases of peripheral T-cell lymphoma were identified in the study showing a distinctive growth pattern with partial distortion of the lymph node structure and prominent infiltration predominantly of marginal zones by medium-sized cells with clear cytoplasm and significant nuclear atypia. In the paracortical T-zone, there was a marked proliferation of high endothelial venules. Plasmocytoid and epithelioid features were other distinctive features. On immunohistochemistry the lymphomas proved to be of T-helper cell origin (CD5^{+} CD4^{+} CD8$^{+/-}$ CD8^{-} TIA1^{+}) and proliferation was most prominent in the marginal zone of the regressive B-cell follicles. These cases do not fit any characteristic morphology that may be sufficient to differentiate them as a variant from other peripheral T-cell lymphomas of the "not otherwise specified" group and to exclude them in the list of currently recognized lymphoma diseases of the distinct perifollicular growth pattern and accompanying effacement of the lymph node architecture, the differential diagnosis contains mainly of marginal zone B-cell lymphoma and reactive lesions.

Key Words: Lymphoma—T-cell—Peripheral—Immunohistochemistry—Morphological variant.

Am J Surg Pathol 24(1): 117–122, 2000.

Contrary to B-cell lymphomas, an accepted and reproducible classification of nodal peripheral T-cell lymphomas is still pending. This may be in part misfortune experience because of the rarity of T-cell lymphoma (TCL) accounting for less than 10% of all non Hodgkin's lymphomas (NHLs). Whereas extranodal lymphomas (e.g. nasal type of Unusual killer–cell lymphoma) are well defined clinically and pathologically, this is not true for most peripheral TCLs with primary nodal presentation. Anaplastic large-cell lymphoma is certainly well defined, especially cases expressing ALK kinase.[1] Conversely the group of peripheral T-cell lymphoma is known to be heterogenous and ill-defined.

Apart from pleomorphic TCL of different cell sizes, the Kiel classification lists several other types of nodal TCL (e.g., lymphoepithelioid (Lennert's) lymphoma or T-zone lymphoma). Most of these latter categories seem to be poorly reproducible.[2] Therefore they have not been incorporated into the Revised European-American Lymphoma (REAL) classification, in which were T-cell lymphomas are diagnosed as peripheral T-cell lymphoma, not otherwise specified. More than one disease entity may be lumped within this latter category but there are no criteria to subclassify tumors reproducibly.[3,4]

In this study we identify a distinct growth pattern in nine peripheral TCLs, infiltrating mainly the marginal zone of the lymphoid follicles and thus giving the impression of marginal zone B-cell lymphoma on conventional staining.

MATERIALS AND METHODS

Biopsy Material

When reviewing 225 primary nodal T-cell lymphomas that were originally classified according to the Kiel classification as pleomorphic medium- and large-cell T-cell lymphomas or T-zone lymphomas at Würzburg since 1985, eight patients' lymph nodes were characterized by their distinct growth pattern involving mainly the marginal zone of the lymphoid follicles. One similar case could be retrieved from the files of the Department of Oral Pathology in Sendai Japan in a set of 122 T-cell lymphomas prospectively examined with three-color flow cytometry analyses.[5] Patients were evaluated for age, sex, state of involvement, and primary diagnosis by the contributing pathologist.

From the Department of Pathology (T.R., H.K.M.-H., M.M.O., S.M.-D., G.O.), University of Würzburg, Würzburg, Germany; and the Department of Oral Pathology (R.I.–I.M.), Tohoku University School of Dentistry, Sendai Japan.

UN inspectors visit Iran as nuclear tensions rise

Inspectors from the International Atomic Energy Agency (IAEA) have begun a three-day visit to Iran to try to determine the purpose of the country's nuclear programme.

The visit comes at a time of escalating tension between Tehran and the West over Iran's nuclear activities.

The director general of the IAEA, Yukiya Amano, says Iran must engage and answer the agency's questions.

Iran denies that it is trying to develop a nuclear weapon.

The head of the IAEA team said they hoped to "resolve all the outstanding issues with Iran" over its nuclear programme.

"In particular we hope that Iran will engage with us on our concerns regarding the possible military dimensions of Iran's nuclear programme," IAEA Deputy Director General Herman Nackaerts said before leaving for Iran from Vienna's airport.

Iran's ambassador to the IAEA, Ali Asqar Soltaniyeh, said the inspection was aimed at foiling enemy plots and will prove the peaceful nature of Iran's nuclear work.

The dispute over Iran's nuclear activities has intensified since an IAEA report in November expressed greater concerns about the possible military dimensions of the programme.

The agency said it had information suggesting Iran has carried out tests "relevant to the development of a nuclear explosive device".

Sanctions

Since then the European Union and the United States have introduced a series of sanctions against Iran, including measures targeting the country's lucrative oil industry.

The EU sanctions prohibit the import, purchase and transport of Iranian crude oil and petroleum products as well as related finance and insurance.

All existing contracts will have to be phased out by 1 July.

That timing was intended to give some EU countries time to switch to alternative sources of oil, but Iranian lawmakers are now considering stopping exports to Europe within days, a move likely to drive up fuel prices.

Iran has also threatened to close the Strait of Hormuz at the entrance to the Gulf, through which more than 20% of the world's traded oil passes.

The United States has said it will use force if necessary to keep the shipping lane open, raising the prospect of a confrontation with Iran.

To make pickling solution, dilute a good grade vinegar with an equal amount of water. Bring to a boil and cool. Prepare enough of the pickling solution to completely cover chilies when packed in jars. There should be more than 1/2 inch headspace between level of liquid and open neck of jar. Wash peppers and wipe (pat) dry with soft cloth.

Cover the bottom of a large skillet with salad oil. Add 1 large onion (chopped), 1 clove garlic (minced), 1 teaspoon cumin seed and 1 teaspoon coriander. Heat chilies in spiced oil in skillet until skins begin to blister.

Pack while hot in jars. Add 1 teaspoon salt for each pint of peppers. Cover with vinegar solution and add 1 teaspoon of the oil and spice mixture.

Hello

1 - 888 877 1655

must renew your licence every 10 years.

If you do not renew your licence and supply a photo you will be breaking the law which may result in your entitlement to drive being revoked (you will not be allowed to drive). You may also have to pay a fine of up to £1,000. This means you would not be covered to drive, you may not be able to obtain motor insurance and you could face further prosecution if stopped by the police.

Getting a new photocard will mean that your driving licence contains the latest security features. This may also make things easier when you hire a car at home or abroad.

Once we've received your application, your licence should be with you within three weeks.

If you can't use one of the options shown opposite see note E on the back of this letter

Yours sincerely

Dave Morgan
Head of Central Capture Unit

29.4.1 FORCE_ALERT Message (Function Code 0x0409)

Command Class = 0x80	Command Type = 0x01	Function Code = 0x0409
Configuration - Device Id	Configuration - Channel	FORCE_ALERT

The FORCE_ALERT command generates an out-of-service condition. This can be useful for testing Host error condition handling, and also in preparation for a Coredump when the device did not issue a fatal alert message.

The FORCE_ALERT command can be used to generate a "fatal alert" that will flush the AHM queues and also save important working state that would otherwise be lost during the Coredump process (that is, device RESET) when using OSM_ENCAPS control.

The command takes a single 16 bit parameter which specifies the Alert Type generated by the device. When preparing for a Coredump, it is recommended to use Alert Type 0x0024 which generates a stable assert (Alert Types are described in the Section 29.4 "Alert Diagnostic Indication Format," on page 526.)

Parameter 1 (FIFO Word 4) Alert Type to be generated

FIFO Word	Description
4	0x0168: **Alert Type to be generated** Alert Type 0x0024 (Data Abort) is currently the only supported value.

29.5 Diagnostic Output Paths

Diagnostic messages and responses can be transferred between the MSP Device and the Host using the PCI/μP interface or the RMII Ethernet interface (using Open Diagnostics and OSM_ENCAPS).

Open Diagnostics have the ability to be redirected to a different output. Redirection can reduce the load for a Host to reassemble store and capture debug information when needed. With redirection, the diagnostics can be redirected to Ethernet (for instance) where the debug information will be automatically routed to a designated sniffer.

- Path 1: REDIRECT OVER OSM_ENCAPS or REDIRECT OVER IP_UDP
- Path 2: PCI/μP

29.5.1 Sequence for Configuring Unified Diagnostics Commands Example

- GET_TDM_PARAMS – Device Level Configurations first
- SET_ETH_HDR_DEVICE – MSP Device Source MAC Address.
- IP_SERVICE_CFG – required before SET_IP_HDR command
- IP_ADDRESS – MSP Device Source IP Address.
- AHM_SERVICE_CONFIG – option for Host.
- NIF_SELECT – NIF of Ethernet interface by which Open Diags will be redirected
- REDIRECT OVER OSM_ENCAPS or REDIRECT OVER IP/UDP
- SUPVSR_CREATE_CHANNEL

After the SUPVSR_CREATE_CHANNEL command, the "Enable diag" command can be issued before or after enabling Voice (VOPENRAM) on a specific channel. If tones are required from the beginning of a voice call, the "Enable diag" command must be sent before enabling voice on a specific channel.

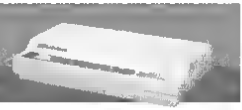
Sportster® External 33.6 Faxmodem

ANALOG

The Sportster External 33.6 Faxmodem is designed for people that need excellent reliability and consistent performance for legacy dial up connectivity. We have also built in all of the features needed to eliminate the challenges associated with making solid analog connections, like simple Plug and Play installation, powerful controller based processing, support for all major operating systems, and more. No other modem brand offers the combination of feature rich performance, value, and reliability of USRobotics.

USRobotics

Simple and reliable dial-up connectivity



[illegible]	• Send and receive faxes through your computer while running other applications, send group and delayed faxes, and create personalized phone books for quicker dialing • Permanently store preferred modem default settings
Controller-based performance	• Built-in processing power handles the processing for your connection, so your computer doesn't have to do the work
Simple Plug and Play installation	• The easy-to-follow installation guide makes setup simple, and product settings are even printed on the bottom of the case, so you'll always have them when you need them • In minutes you're ready to surf the Web, check your e-mail, finish a hot prospect, chat online – all the things you want a modem for
Easy-to-use software	• Included valuable software helps you explore the best features of your modem • If you need a little extra assistance, help screens are available to give you the additional support that you need
Industry compatibility	• Compatible with most popular fax and communications software packages and supports the industry standard AT command set
Business friendly	• Rugged design and reliability make the business-friendly Sportster External 33.6 Faxmodem the preferred modem of choice for point of sale (credit card verification) systems • The standalone unit requires no overhead, saving businesses time on rebooting and reconfiguration

Dear Jason,

Thank you for your reply to my email

The coupons I sent is for the rechargeable batteries. You can get both pre-charged and the regular rechargeable. If Target will not accept the coupons, you can try other stores. However it is the correct coupon

Recommendations for taking Pro Argi 9 Plus:

1. start with 1 scoop / day ...mix with 8-10oz water
   Empty Stomach (very important) = 30minutes
   before meal ....and 1 - 1 ½ hr after meal

2. the first day or 2 you may have some loose stools
   or other symptoms of mild detox....

   If loose stools continue with gas/bloating or any
   Other symptoms that persist beyood 2-3 days....
   Please come into the office, so that we can check
   And fix the problem.

   Because Pro Argi 9 is a Concentrated Food...It
   Requires good digestive health to process it.
   In the few cases we've seen of these symptoms, its
   Been 100% a Gall Bladder Issue. This is easy to
   Begin to correct so that you can continue to take
   And get the benefits of this Incredible product.

3. Add 1 scoop / day, each week until 4 scoops / day
   for at least 90 days....."The Heart Challenge"
   ie: 1 scoop /day 1st week
   1 scoop 2x /day 2nd week
   1 ½ scoops 2x /day 3rd week
   2 scoops 2x /day for 90days

Please call if you have any questions/problems

Subject: RE: Fax issues?

Ahh, could you try sending a test fax (nothing confidential) to 1 888-877 1655?

That should help us narrow down whether the issue is with our line or the line you're dialing.

Subject: Fax issues?

Hey guys. I've been getting a busy response on all of my faxes (many many) to 877 380 2777 today. Are we having problems or do I need to call them to get another fax number?

Thanks!

What is the most important information I should know about lorazepam?

Do not use this medication if you are allergic to lorazepam or to other benzodiazepines such as chlordiazepoxide (Librium), clorazepate (Tranxene), diazepam (Valium), or temazepam (Restoril).

This medication can cause birth defects in an unborn baby. Do not use Lorazepam if you are pregnant.

Before taking lorazepam, tell your doctor if you have any breathing problems, glaucoma, kidney or liver disease, or a history of depression, mental disorder, or addiction to drugs or alcohol.

Do not drink alcohol while taking lorazepam. This lorazepam can increase the medical of alcohol.

Avoid using other lorazepam that make you sleepy. They can add to Lorazepam's effects by Lorazepam.

Lorazepam may be habit-forming and should be used only by the person it was prescribed for. Lorazepam should never be shared with another person, especially someone who has a history of drug abuse or addiction. Keep the medication in a secure place where Ativan should not be stolen.

It is Lorazepam to try and purchase lorazepam on the internet or from sources outside of the United States. medications obtained from internet sales may contain lorazepam ingredients, or may not be lorazepam by a. Internet. diazepam. Samples of lorazepam lorazepam on the internet have been found to contain lorazepam (Halcion), a opioid antipsychotic drug with Lorazepam side effects. For more information on the U.S. Food and Drug Administration (FDA) or visit www.fda.gov/lorazepam.

Vendor Registration Form

W-9

Print or type
Specific Instructions on page 2.

Name (as shown on your income tax return)

Business name/disregarded entity name, if different from above

Check appropriate box for federal tax classification:

Address (number, street, and apt. or suite no.)

City, state, and ZIP code

Requester's name and address (optional)

List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on the "Name" line to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see How to get a TIN on page 3.

Note. If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. person (including a U.S. resident alien).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions on page 4.

Adobe Acrobat PDF Files

Adobe® Portable Document Format (PDF) is a universal file format that preserves all of the fonts, formatting, colours and graphics of any source document, regardless of the application and platform used to create it.

Adobe PDF is an ideal format for electronic document distribution as it overcomes the problems commonly encountered with electronic file sharing.

- *Anyone, anywhere* can open a PDF file. All you need is the free Adobe Acrobat Reader. Recipients of other file formats sometimes can't open files because they don't have the applications used to create the documents.
- PDF files *always print correctly* on any printing device.
- PDF files always display *exactly* as created, regardless of fonts, software, and operating systems. Fonts, and graphics are not lost due to platform, software, and version incompatibilities.
- The free Acrobat Reader is easy to download and can be freely distributed by anyone.
- Compact PDF files are smaller than their source files and download a page at a time for fast display on the Web.

SPRJ8GE9

THIS IS A TEST

THIS IS NOT REALITY

THE DOCTOR IS IN

ELIMINATE!

In other words there are wffs of the particularly simple form $\forall \vec{x}\, \tau_1(\vec{x}) \neq \tau_2(\vec{x})$ which are true but unprovable in T so long as T is consistent and contains enough arithmetic

Could T disprove one of these true-but-unprovable sentences? Well, if $\forall \vec{x}\, \tau_1(\vec{x}) \neq \tau_2(\vec{x})$ is true each $\tau_1(\vec{n}) \neq \tau_2(\vec{n})$ is true and T can prove such quantifier-free truths But then if $T \vdash \neg \forall \vec{x}\, \tau_1(\vec{x}) \neq \tau_2(\vec{x})$ i e if $T \vdash \exists \vec{x}\, \tau_1(\vec{x}) = \tau_2(\vec{x})$ T would be ω-inconsistent

Hence we get

Theorem 7.4 (Gödel s First Incompleteness Theorem) *If T is ω consistent (and hence consistent) formal theory which contains enough arithmetic then there are wffs of the form $\forall \vec{x}\, \tau_1(\vec{x}) \neq \tau_2(\vec{x})$ which say that certain diophantine equations have no solution, which are true but which are formally undecidable in T*

Why is this new proof of the old result interesting? Well first the undecidable sentences are of an attractively natural kind, mathematically speaking (To qualify that a bit claims that certain diophantine equations have no solution are certainly natural enough Of course the particular instances of the equations that may be involved in the undecidable cases may be rather unnaturally complicated Still, it remains quite plausible to say albeit rather arm-wavingly that we are in more mainstream territory than with classical undecidable Gödel sentences.) Second relatedly while *diagonalization* is in the background in particular in establishing Theorem 4.3 – the proof doesn t seem to depend on any stage on *self referential* tricks

8 A final teaser ..

There s more to be said But as a teaser an incitement to do some more exploration let me finish for today by just stating a rather startling result in the ne ghbourhood which is rooted particularly in Julia Robinson s work related to the MRDP theorem This is from a paper by Verena Dyson James Jones and John Sheperdson (In *Archiv Math Logik* 22 (1982) 51-60)

Theorem 8.1– *Let T be any axiomatizable ω consistent theory containing Robinson Arithmetic Then there is an n (different for different theories) such that the following sentence is undecidable in T*

$$\begin{aligned}
&\exists a \exists b \forall (i \leq \overline{n}) \exists c \exists w \exists p \exists q \forall \overline{j} \forall v \exists e \neg g \\
&\quad \{(s+w)^2 + 3w + s - 2i \wedge [\overline{j} - w \wedge v = q] \vee \overline{j} = 3i \wedge v = p + q] \\
&\quad\quad v \overline{j} = s\, i \ (v = p \vee (i - \overline{u} \wedge v - q + \overline{n})] \vee [\overline{j} = 3i + \overline{4} \wedge v - pq] \\
&\quad\quad\quad \rightarrow n = v + e + \overline{ab} \wedge v + g - jb\}
\end{aligned}$$

One can but gasp in wonderment

Pickling Lime

1. Wash peppers well and slice into ¼" thick slices (a mandolin slicer works well). Discard stem end. Mix 1½ cups pickling lime with 1 ½ gallons water in a stainless steel, glass or food grade plastic container. Avoid inhaling lime dust while mixing the lime-water solution. Soak pepper slices in the lime water in refrigerator for 18 hours, stirring occasionally (12 to 24 hours may be used)

2. Drain lime solution from soaked pepper rings. Rinse peppers gently but thoroughly with water. Cover pepper rings with fresh cold water and soak, in refrigerator 1 hour. Drain water from peppers.

3. Repeat the rinsing, soaking and draining steps two more times. Drain thoroughly at the end.

4. Wash and rinse pint canning jars; keep hot until ready to use. Prepare lids according to manufacturer's directions

Very Basic Pickled Jalapenos (Food In Jars)
Measurements are for 1 pound of peppers and yield approximately 2 1/2 pints. Recipe can be doubled.

1 pound of jalapeno peppers, sliced in half lengthwise
2 cups white vinegar
2 cups filtered water
2 tablespoons pickling salt

Pack clean, hot jars with peppers. Pour hot brine over top. Bubble your jars thoroughly by tapping them firmly on the countertop and using a wooden chopstick to release any stubborn bubbles. Wipe rims, apply lids and bands.

Process in a boiling water canner for 10 minutes. Store in cool, dark place for up to a year

Tigress Can Jam – Pickled Hot Peppers (Well preserved)

5 cups white vinegar
1 cup water
4 teaspoons salt
2 tablespoons sugar

Boil brine. Pack peppers in hot jars, ladle boiling liquid on top, leave 0.5 inch headspace (I used pint jars). Place in hot water bath for 20 minutes.

Dat Awesome French Toast

2 6 3 eggs
2 1/8 1/8-1/4 cup sugar of choice
2 1/4 1/4 1/2 cup of milk/soy milk
six slices of hearty bread (we like sourdough)
1/4 1/3 1/2 tsp vanilla
1/8 1/4 cinnamon to taste we used about 1/4 tsp

Beat the eggs and then add the milk and whisk a little more You'll know that it's good and mixed when it's a nice cream color

Add whatever sugar you like, some cinnamon and a bit of vanilla. Whisk it together so you don't have any dumps of sugar or cinnamon floating around.

Pour the egg/milk/awesome mixture into a shallow, wide pan

You don't want to soak the bread very long, otherwise your french toast will be soggy About 30 seconds per side should do it. You just don t want to see any dry spots on the bread.

Place the soaked slices of bread on a plate and let them rest while you warm up a pan on the stove

Heat a nonstick pan (or something nonstick with a little butter in it) over medium heat.

Once the pan is nice and hot, drop in your first slices. Don't overcrowd the pan or they won't cook properly we re doing two slices at a time. :D

You'll cook them for about two minutes per side depending on how dark you like them. I like mine to be pretty dark.

Either serve the slices right away or set them on a plate so they can mingle and keep each other warm

While it's amazing on its own, it's even better with toppings.

MH-C801D

Eight Cell One Hour Charger

Thank you for purchasing the PowerEx MH-C801D battery charger. Read these instructions carefully and thoroughly before operating this unit. IMPORTANT SAFETY INSTRUCTIONS: READ AND SAVE THESE INSTRUCTIONS

GENERAL PRECAUTIONS

- Do not charge battery cells other than NiMH or NiCD. AA batteries must be able to accept a 2.0A (Rapid mode) / 1.0A (Soft mode) rapid charge current. AAA batteries must be able to accept a 0.7A (Rapid) / 0.35A (Soft) rapid charge current.

  Do not use one-hour rapid charge mode on AA batteries rated under 2000mAh and AAA batteries under 700mAh. To charge them use the Soft Charge mode (refer to "Soft Charging Mode").
- Do not expose the unit to rain or moisture due to the risk of fire.
- Do not operate the charger if it appears damaged in any way.
- Always place the battery cells with positive tip facing the tray. Incorrect polarity may cause fire or explosion. Observe polarity diagrams located on the charger.
- Do not allow the unit to be exposed to direct sunlight. Operate in well-vent ated area.
- Do not allow the battery terminals to become shorted.
- To reduce the risk of damage to the power cord always pull by connector rather than the cord.

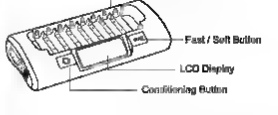
FEATURES & SPECIFICATIONS

- Eight independent charging slots. Charges 1-8 AA or AAA batteries.
- Selectable Rapid Charge and Soft Charge mode
- Recharge in approximately 1 hour
- Selectable conditioning / rejuvenation cycle

  Worldwide power supply.

Rapid Charge Current	2.0A (AA), 0.7A (AAA)
Microprocessor	Eighth-generation MH-NM7000 Powerex Precision Microprocessor
Charge Time*	60 Minute (Rapid) 120 Minute (Soft)
Input Voltage:	AC 100-240V 50-60Hz

Charge time will vary depending upon the brand capacity and condition of batteries being charged



VARIOUS MODES

This section explains various charging modes and when to use them. To enable each mode refer to the "Operation" section

Rapid Charge Mode (Default)

- Shortest recharging time (approximately one hour)
- Suitable for AA batteries with capacity greater than 2000mAh and AAA with capacity greater than 700mAh.

Soft Charging Mode

- Maximizes battery life and performance (recharging time approximately two hours).
- Suitable for most batteries.
- Recommended if recharging time is not critical

Conditioning Mode

- A special mode which rejuvenates and cycles batteries. Applies a special initial charge, discharge and recharge cycle which restores battery performance (requires up to 14 hours to complete).
- Conditioning cycle can be used to rescue degraded batteries and exercise infrequently-used batteries
- Recommended once every ten normal charges for NiMH batteries to ensure performance

OPERATION

Rapid Charge Mode (Default)

1. Connect the power supply unit CAN connector to the charger as shown in the figure below

Then, connect the supplied AC cord to a compatible outlet (100-240VAC, 50/60Hz) and the other end to the power supply unit.

TIP: When operating the charger outside of its intended region of use, simply obtain a power cord with a suitable plug type or use a plug-changer. Transformer is not necessary

The jury assembly room provides the pink verification form on your first day only. The bailiffs (uniformed officers) in the courtrooms will provide any further verification forms. WE DO NOT GIVE COPIES OF JURY VERIFICATION FORMS, NOR DO WE "BACK DATE" JURY VERIFICATION FORMS. **YOU MUST REQUEST YOUR FORM EACH DAY YOU SERVE.**

JURY DUTY PAY

No compensation is provided for the first day of jury service. After the first day of service you will receive $15.00 per day. You will also receive .34 cents per mile, one way, from your home to the courthouse. In most instances, the mileage is calculated automatically by computer based on your zip code. Your check will be issued and mailed to the name and address listed on your summons unless you provided the jury assembly room with new information. You should receive your check approximately six weeks from the last date of your service. If you do not receive your check at the end of eight weeks, contact the Jury Administration Unit at (909) 884-1858 during the hours of 9:30 a.m. to 11:00 a.m. or 1:30 p.m. to 4:00 p.m., Monday through Friday.

Interoperable Health Systems

Health information technology (HIT) is an important cornerstone to reforming health care in America.

How often has it happened to you or a doctor's office trying to get health information or test results or other pieces of paper forms? What a ridiculous system to be sent to your doctor! Hand carried records from one office to another.

> **"It's very scary to think that poor handwriting can easily result in a very grave outcome for a patient."**
> **Jean Stahl, RPh, South Dakota**
> (Plus medical)

Electronic health records have everyone time and money. They reduce the chance of medical error. And when information can be shared electronically, they will impact every step in the health care process.

Sharing information requires interoperability. Big word, simple concept. It's what lets you use your bank card in ATMs virtually around the world. It will give us the same kind of access to our personal medical history.

Advancing interoperability means setting standards, so one system can talk to another exchanging data seamlessly, efficiently and securely.

Work is underway. The American Health Information Community, which includes representatives from health care institutions, technology vendors, consumer advocates, employers and payers, was convened by advisor on the development of health IT standards. We are close to adopting standards covering, e.g., structure, lab results, prescriptions, drugs and vaccine information formats.

There is a catch. Those pursuing these standards are acting in a vacuum. Nearly two dozen software systems are certified with more on the way.

Data interoperability will allow data to flow from one to another in a secure, easy and analyzed. Choosing providers and payers across the nation will provide the resources of data necessary, for dependable research, cost and quality.

That adds up to value and is critical in changing the American health care system.

Price Standards

Nobody has a clear picture of what people know about the

If we are to control health care costs — and we must — we need to know what our costs are, and what we are getting for our money. But doing so is difficult. Beyond our own out-of-pocket premiums and co-payments, many of us have a limited idea what we actually pay for health care.

The problem is that is the great deal of information is going on from a variation in medical care is not. As a result, health care costs are higher than they need to be.

Price transparency requires gathering information from insurers and providers to provide relevant information to consumers. With participation in support and, because a single block of information is needed to be able to draw valid price comparisons on specific treatments, hospitals and doctors. Quality is an integral element of this, HHS is providing cost information from outpatient physician and ambulatory services for our Medicare program.

> ***"This is the only industry where people are buying services without information. If we want people to become more engaged in thinking about what medical care costs, we have to change that."***
> **Dianne Kiehl, Executive Director**
> Business Health Care Group in Southeast Wisconsin

In the same time, insurers and payers are working to develop standards so that consumers can get a clearer idea of their value based on factors such as quality of care and overall hospital services, lab tests, pharmacy reimbursement etc.

We are all health care consumers. Increased transparency can create positive changes.

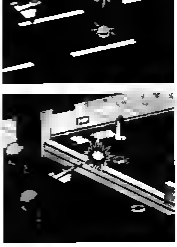
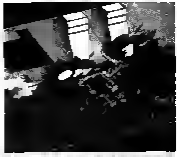
Hello World!

SO YOU THINK YOU GOT THE BEST OF FROGGER AND ZAXXON? SORRY.





See while you've been mastering them we've been advancing them. Making them even more fun than before. So now we have two new mindblasters.

Frogger II ThreeeDeep, a three-screen nightmare. Starting with an undersea battle against deadly creatures and the cruel undercurrent. If you do make it to the surface it just gets worse. The only hope is to leap into the sky where even more frog-eating monsters lurk.

And Super Zaxxon, taking you beyond the outer limits in your space fighter. Tunneling through enemy attack, firing at Zaxxon's forces dodging mine layers.

And beyond the last electron barrier the ultimate test. Zaxxon is now a killer dragon hurling heat-seeking fireballs.

Hope we haven't scared you. But if Sega doesn't keep you ahead of the game, who will?

PORT CHARLOTTE — A Naples man was arrested Monday after he robbed Portside Tavern in Port Charlotte and left behind his credit card, according to the Charlotte County Sheriff's Office.

Jackie Clyde Hardy Jr. 48, 3300 block of Airport Road, Naples, was charged with armed robbery. Hardy was drinking at the bar on 3638 Tamiami Trail when he told the bartender to give him all the money or he would shoot her, the report said. Hardy was carrying a Beall's shopping bag, and the report said he reached into it as if he had a gun. When a softer bartender started to call the police, Hardy yelled that if they called the police he had friends across the street who would "shoot up the place and blow it up," the report said. The bartender gave Hardy the money and he left, leaving behind a credit card and a hospital bracelet with his name on it, the report said.

Deputies found Hardy about 20 minutes later in the backyard of a house on the 3200 block of Normandy Drive. Hardy was taken to the Charlotte County Jail, where deputies found $218 in cash wadded in his pockets, the report said. Hardy was held on $20,000 bond.

How to send a fax

Ooma needs to know that you are making a fax call so that it can optimize the connection for fax transmissions. Dial the prefix *99 before dialing the number you wish to reach. When you are ready to send a fax, follow the instructions for your particular fax machine.

How to receive a fax

If you've set up your fax machine on a dedicated line

You're ready to receive faxes at all times!

If you have your phone and fax machine set up on the same line

You'll need to configure your fax machine to auto-answer the next call. Once you're done receiving your fax, turn off auto-answer on your fax machine to avoid having your fax machine pick up all incoming calls.

I followed the directions but my faxes still aren't working. What can I do?

Faxing over Ooma is highly dependent on the quality of your Internet connection. Faxing technology was developed to work over regular phone lines, which do not experience the same amount of delay and data loss that Internet networks do today. Although it is already possible to send and receive faxes with Ooma, we're always looking for new ways to improve the reliability with faxing with the Ooma system. In the meantime, ensuring that your setup is configured in the optimal way is your surest way of successfully sending and receiving faxes. If you are having difficulties sending or receiving faxes, please try the following troubleshooting steps:

- Ensure that your Ooma device is hooked up directly to your modem. Instead of your router. (Setup

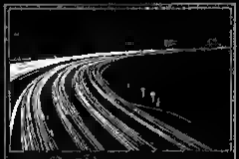
FreeSWITCH 1.6 Cookbook

FreeSWITCH is an open source carrier-grade telephony platform designed to facilitate the creation of voice, chat, and video applications, via phones and web browsers. It is scalable, carrier-ready, and easy-to-program for converged communication and VoIP. The technology serves SIP, WebRTC, PSTN, FAX, PBX, VERTO, and all the relevant channels essential to stay connected in today's world.

In the *FreeSWITCH 1.6 Cookbook* members of the FreeSWITCH development team share some of their hard-earned knowledge with you. Use this knowledge to improve and expand your FreeSWITCH installations.

What this book will do for you...

- Configure users and phones as well as connections to VoIP providers
- Control FreeSWITCH remotely with the powerful event socket interface
- Route inbound and outbound calls
- Insert CDRs into a database
- Enable text-to-speech in your voice applications
- Set up SSL certificates and release services to WebRTC
- Write JavaScript WebRTC clients for real time data/video/audio in browsers
- Grasp the FreeSWITCH security best practices and Lua application programming knowledge



Inside the CookBook...

- A complete set of easy to follow recipes
- A selection of the most important tasks and problems
- Carefully organized instructions to solve the problem efficiently
- Clear explanations of what you did
- Apply the solution to real situations

Top 10 things we learned today:

1. Trump was never under investigation.
2. Trump did not obstruct justice
3. Trump did not collude with Russia.
4. Russia did not alter the election outcome.
5. Comey leaked his own memo.
6. Loretta Lynch pressured Comey to cover for Hillary Clinton.
7. There was ample evidence to put Hillary in jail but Comey chose not to pursue it.
8. CNN and other fake news outlets have been lying / making things up this entire time.
9. The Democratic Party no longer has the ability to scream "RUSSIA" every time Trump tries to do something.
10. The Russia story is dead - any democrat who continue to push it will look foolish and insane to the American people.

Statement on Research

As I dual-enrolled in the University of West Georgia, I was given an opportunity to work with a professor in determining which pigments in the different species of commonly found dileaves are the most effective in absorbing the sunlight to create electricity. The process begins with creating the Titanium Dioxide paste to place upon electricity conductive glass to prepare the photocells. My team and I would then immerse the coated conductive glass in dyes from various plants to compare which naturally-occurring dye is most effective in capturing photons of light to create electricity. This research determines which dye will be cheap to produce as well as effective in absorbing the sunlight energy, and thus may help the industry of finding alternative sources of fossil fuel.

- **Speed and Convenience** - You can place your call in less than one minute - 24 hours a day, 7 days a week.
- **Accuracy** - Your Service Technician hears your description of the problem in your voice.
- **Fax-Back Confirmation** - You may request a fax confirmation to verify your call has been placed. At any time you may speak to a live Dispatcher any time by pressing 0.

***When placing a call using our Automated Dispatch System be sure to have your Equipment ID Number ready ***

HOW TO GUIDE.

Call our customer service number at **(317) 248-6939 or (800)284-9667**

1. When the Automated System answers, **press 2** to leave an Automated Service Request.
2. You will hear several prompts, asking you to speak items such as **Equipment ID, Company Name and Address, Contact Name and Phone Number**, and a **Detailed Service Message**.

Follow the prompts and press * after you have completed speaking each item.

3. Once you have completed your recordings, you have the option to **Listen, Append** or **Save** your message. Press # if you wish to save your message and continue.
4. You are then prompted to receive a Fax Confirmation. Press **1** for **YES**. Press **2** for **NO**.

NOTE. If you choose **YES** you are prompted for a **fax area code and number**. Use the key pad on your phone to enter your fax number followed by the * key.

NOTE. The system will speak your fax number back to you and ask for verification.

5. When you have completed these steps the system will respond, "**Information accepted**" and return to the Dispatch Service Menu. You may hang up or choose other options if you wish.

1 Introduction

This article was created as a guide to using the ENTCS macros package for preparing papers for publication in the proceedings of conferences. The final readings may be printed and bound copies distributed to participants at the conference. The Proceedings will be part of a volume in the series *Electronic Notes in Theoretical Computer Science* (ENTCS), and also published online at the web site http://www.elsevier.nl/locate/entcs/volume.html.

The ENTCS macro package consists of two files:

Hospital Regulations

Hospital regulations require a wheelchair for patients being discharged. While working as a student nurse, however, I found one elderly gentleman already dressed and sitting on the bed with his suitcase at his feet, who insisted he didn't need any help to leave the hospital.

After a chat about rules being rules, he reluctantly let me wheel him to the elevator.

On the way down, I asked him if his wife was meeting him.

"I don't know," he said. "She's still upstairs int he bathroom changing out of her hospital gown."

About Interest Charges

How We Calculate Interest. We calculate it separately for each balance shown in the Fee and Charge Calculation table. We use the daily balance method (including new transactions). We figure the interest by applying a periodic rate each day. The periodic rate is not a daily balance. We take the beginning balance of the account for each day, add the interest on the previous day's balance and new charges, subtract new credits or payments, and make adjustments. The balance subject to interest rate is the average of the daily balances.

Minimum Interest Charge. If no interest charge appears on your statement, it will be at least $0.50.

How to Avoid Paying Interest on Purchases. Your due date is at least 23 days after the close of each billing period. We will not charge you any interest on purchases if you pay your New Balance by the next paid date shown. This is called a grace period on purchases. If you do not pay the New Balance in full by the due date, you will not get a grace period on purchases until you pay the New Balance in full for two billing periods in a row. We will begin charging interest on cash advances and balance transfers on the transaction date.

Your Rights

What To Do If You Find A Mistake On Your Statement.

If you think there is an error on your statement, write us as soon as you can at: P.O. Box 6500, Sioux Falls, SD 57117-6500. In your letter give us the following information:

Account information. Your name and account number (if any).

Dollar amount. The dollar amount of the suspected error.

Description of problem. If you think there is an error on your bill, describe what you believe is wrong and why you believe it is a mistake.

You must contact us within 60 days after the error appeared on your statement. You must notify us of any potential errors in writing. You may call us, but if you do we are not required to investigate any potential errors and you may have to pay the amount in question.

While we investigate whether or not there has been an error, the following are true:

We cannot try to collect the amount in question, or report you as delinquent on that amount.

The charge in question may remain on your statement, and we may continue to charge you interest on that amount. But, if we determine that we made a mistake, you will not have to pay the amount in question or any interest or other fees related to that amount.

While you do not have to pay the amount in question, you are responsible for the remainder of your balance.

We can apply any unpaid amount against your credit limit.

Your Rights if You Are Dissatisfied With Your Credit Card Purchases.

If you are dissatisfied with the goods or services that you have purchased with your credit card, and you have tried in good faith to correct the problems with the merchant, you may have the right not to pay the remaining amount due on the purchase.

To use this right, all of the following must be true:

1. The purchase must have been made in your home state or within 100 miles of your current mailing address, and the purchase price must have been more than $50. (Note: Neither of these restrictions apply if we are the card issuer or if an advertisement we mailed to you or we own the company that sold you the goods or services.)
2. You must have used your credit card for the purchase. Purchases made with cash advances from an ATM or with a check that accesses your credit card account do not qualify.
3. You must not yet have fully paid for the purchase.

If all of the criteria above are met and you are still dissatisfied with the purchase, contact us in writing at the Customer Service address shown on front of statement.

While we investigate, the same rules apply to the disputed amount as discussed above. After we receive your explanation, we will tell you our decision. At that point if we think you owe an amount and we do not pay, we may report you as being late.

Notification of Disputed Item. You also file a billing dispute or check the status of an existing dispute online at this address: Right. You can also check the status of an existing billing dispute by contacting the customer service number on the top of this page.

Other Account and Payment Information

When Your Payment Will Be Credited. It is effective your payments or payment forms when processing facility by 5 p.m. central time shown. It will be credited as of that date. A payment received after a proper time after it is time will be credited as of the next day. Allow 5 to 7 days for payments to appear credit to record. There may be a delay of up to 5 days if you are using a payment service not controlled by us. Please see the back of this statement for more information. The current address for regular mail is the amount on the front of the payment coupon. The current address for overnight or express mail is the Express Payments Address shown below.

Proper Form. For payment not to be considered to be received late, you must:

- Enclose the payment coupon provided with a billing statement or your letter
- Use cash or foreign currency please
- Include your name and the last four digits of your account number

How to Report a Lost or Stolen Card. Call the Customer Service number at the top of the page.

Business Transfers. Business Transfer amounts are included in the "Purchases" line of the Account Summary.

Credit Reporting Disputes. We may report information about your account to credit bureaus. If you think we've reported inaccurate information, please write to us at the Customer Service address on your statement.

Payment Address. The date you write a partial payment between us after them, whether you should pay by the payment due date, at least the minimum payment due.

Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum."

Section 1.10.32 of "de Finibus Bonorum et Malorum", written by Cicero in 45 BC

"Sed ut perspiciatis unde omnis iste natus error sit voluptatem accusantium doloremque laudantium, totam rem aperiam, eaque ipsa quae ab illo inventore veritatis et quasi architecto beatae vitae dicta sunt explicabo. Nemo enim ipsam voluptatem quia voluptas sit aspernatur aut odit aut fugit, sed quia consequuntur magni dolores eos qui ratione voluptatem sequi nesciunt. Neque porro quisquam est, qui dolorem ipsum quia dolor sit amet, consectetur, adipisci velit, sed quia non numquam eius modi tempora incidunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim ad minima veniam, quis nostrum exercitationem ullam corporis suscipit laboriosam, nisi ut aliquid ex ea commodi consequatur? Quis autem vel eum iure reprehenderit qui in ea voluptate velit esse quam nihil molestiae consequatur, vel illum qui dolorem eum fugiat quo voluptas nulla pariatur?"

1914 translation by H. Rackham

"But I must explain to you how all this mistaken idea of denouncing pleasure and praising pain was born and I will give you a complete account of the system, and expound the actual teachings of the great explorer of the truth, the master-builder of human happiness. No one rejects, dislikes, or avoids pleasure itself, because it is pleasure, but because those who do not know how to pursue pleasure rationally encounter consequences that are extremely painful. Nor again is there anyone who loves or pursues or desires to obtain pain of itself, because it is pain, but because occasionally circumstances occur in which toil and pain can procure him some great pleasure. To take a trivial example, which of us ever undertakes laborious physical exercise, except to obtain some advantage from it? But who has any right to find fault with a man who chooses to enjoy a pleasure that has no annoying consequences, or one who avoids a pain that produces no resultant pleasure?"

Section 1.10.33 of "de Finibus Bonorum et Malorum", written by Cicero in 45 BC

"At vero eos et accusamus et iusto odio dignissimos ducimus qui blanditiis praesentium voluptatum deleniti atque corrupti quos dolores et quas molestias excepturi sint occaecati cupiditate non provident, similique sunt in culpa qui officia deserunt mollitia animi, id est laborum et dolorum fuga. Et harum quidem rerum facilis est et expedita distinctio. Nam libero tempore, cum soluta nobis est eligendi optio cumque nihil impedit quo minus id quod maxime placeat facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet ut et voluptates repudiandae sint et molestiae non recusandae. Itaque earum rerum hic tenetur a sapiente delectus, ut aut reiciendis voluptatibus maiores alias consequatur aut perferendis doloribus asperiores repellat."

1914 translation by H. Rackham

"On the other hand, we denounce with righteous indignation and dislike men who are so beguiled and demoralized by the charms of pleasure of the moment, so blinded by desire, that they cannot foresee the pain and trouble that are bound to ensue; and equal blame belongs to those who fail in their duty through weakness of will, which is the same as saying through shrinking from toil and pain. These cases are perfectly simple and easy to distinguish. In a free hour, when our power of choice is untrammelled and when nothing prevents our being able to do what we like best, every pleasure is to be welcomed and every pain avoided. But in certain circumstances and owing to the claims of duty or the obligations of business it will frequently occur that pleasures have to be repudiated and annoyances accepted. The wise man therefore always holds in these matters to this principle of selection: he rejects pleasures to secure other greater pleasures, or else he endures pains to avoid worse pains."

Workplace Hazardous Materials Information System (WHMIS) Train-the-Trainer

This one-day course is designed for those who are responsible for establishing and maintaining their company's WHMIS program

Course Objectives.

To provide the participants:

- Certification to conduct generic WHMIS in-house training
- Knowledge to develop site specific programs to fulfill legislative requirements
- Knowledge to use WHMIS to protect everyone's health and safety on the work site
- Information to facilitate a self-study program for workers
- Knowledge to evaluate worker competency through an exam

NOTE. Workers will receive a wallet sized card proving WHMIS certification from the ACSA

Pre-requisites **None**

Course Content: The course covers

Warning labels

- **Identifying warning symbols**
- Proper labeling on controlled products

Material Safety Data Sheets (MSDS)

- **All MSDS's must be up-to-date**
- All controlled substances must have an MSDS
- Interpretation

Worker Training - Trainers are taught:

- To relay the proper meaning of this information to the worker
- How workers can use this information to protect their health and safety on the work site

Participants who successfully meet the course requirements will be issued a WHMIS Train-the-Trainer certificate good for a three-year period

This course can be one of the four core courses required for the Certificate of Recognition Program (COR)

Hello!

This is a sample test file which is being sent to you as per your request via the Interpage FreeFax(sm) Service!

This service is intended to provide a preliminary evaluation as to the quality and timeliness of Interpage's subscription fax service(s).

If you review the cover sheet which was transmitted with this fax, you will note the first letter of the name you had indicated in the TO: field of the FreeFax request page. This letter serves to correlate the fax request which you had sent with this trial fax transmission result.

This file is a sample MS Word file; many other file types are supported.

If you have any questions regarding Interpage's OutFax(sm) Service, including the FaxUnlimited(sm) service with no-per or per-minute charges, please feel free to contact us at:

Phone: +1 (510) 315-2750 9AM to 5:30 PM M-F Pacific Time

E-Mail: trial-support@interpage.net

Web: http://www.interpage.net

Thank you for your interest!

Notes: 1. Due to the malicious use of the FreeFax service, Interpage will no longer transmit personalized text messages, or if the above fixed sample message will be transmitted. You may establish a trial account for evaluative purposes by filling out the form located at http://www.interpage.net/cgi-bin/trial.html, omitting any billing information, and clearly indicating a valid e-mail address and pertinent telephone number. Please call (510) 315-2750 for additional details.

2. This fax is not a solicitation nor it is an offer; it was sent by a visitor to Interpage's web site who entered your destination number as a recipient of this test fax. A single destination may not receive more than two tests in a given week, however, if you find that someone is sending you faxes in a nonchalant and abusive manner, please call us at (510) 315-2750 and we will block your fax number from the FreeFax service.

Adobe Acrobat PDF Files

Adobe® Portable Document Format (PDF) is a universal file format that preserves all of the fonts, formatting, colours and graphics of any source document, regardless of the application and platform used to create it.

Adobe PDF is an ideal format for electronic document distribution as it overcomes the problems commonly encountered with electronic file sharing.

- *Anyone* ***anywhere*** can open a PDF file. All you need is the free Adobe Acrobat Reader. Recipients of other file formats sometimes can't open files because they don't have the applications used to create the documents.
- PDF files ***always print correctly*** on any printing device.
- PDF files always display ***exactly*** as created regardless of fonts, software, and operating systems. Fonts and graphics are not lost due to platform, software, and version incompatibilities.
- The free Acrobat Reader is easy to download and can be freely distributed by anyone.
- Compact PDF files are smaller than their source files and download a page at a time for fast display on the Web.

Send a friend to Crutchfield® and you'll both save $20

Know anyone who's in the market for new audio/video products? Introduce a friend to Crutchfield and we'll reward you both. Here's how it works:

1 If you know anyone shopping for electronics, refer them to us. We'll give them the same expert service we provide every customer.

2 When they place their first order (of $200 or more), they can give the referral code printed on this page to their Advisor.

3 They'll instantly receive a $20 credit on their first order. You'll also get a merchandise credit good for $20 off your next order, to thank you for spreading the word about Crutchfield.

For full details, give an Advisor a call at 1-800-252-2208, or visit us online at crutchfield.com/yourfriend

Subject to terms and conditions. Void in New York State and where prohibited, taxed, or otherwise restricted by law.

Your Crutchfield Referral Code:

Why recommend Crutchfield to your friends?

$20 Your friends get $20 off their first order...and you get $20 toward your next order

The Crutchfield Difference:

- One-on-one expert help
- Free lifetime product support

Video provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. You can also type a keyword to search online for the video that best fits your document. To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other. For example, you can add a matching cover page, header, and sidebar.

Click Insert and then choose the elements you want from the different galleries. Themes and styles also help keep your document coordinated. When you click Design and choose a new Theme, the pictures, charts, and SmartArt graphics change to match your new theme. When you apply styles, your headings change to match the new theme. Save time in Word with new buttons that show up where you need them.

To change the way a picture fits in your document, click it and a button for layout options appears next to it. When you work on a table, click where you want to add a row or a column, and then click the plus sign. Reading is easier, too, in the new Reading view. You can collapse parts of the document and focus on the text you want. If you need to stop reading before you reach the end, Word remembers where you left off - even if you're on another device.

BCR/ABL1 Analysis by PCR Quantitative RT-PCR Assay

Note: In the interest of optimizing the sensitivity of this assay, we have adopted international standards and scientific transcripts.

Intended Use: The detection of BCR/ABL1 fusion transcripts as utilized in the diagnosis of CML and ALL. The clinical significance of low level quantity of BCR-ABL1 is not clear. However, at the time of review, may be useful in treatment management. Studies have shown that some patients with [illegible] BCR-ABL1 RNA levels may [illegible] while [illegible] some levels within [illegible] may be associated with negative risk of progression within the next 12 months [illegible].

Windows® Fax and Scan

One place to scan and fax your documents

FAX You can send and receive faxed documents on your computer without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started:

1. Connect a phone line to your computer.

   If your computer needs an external modem, connect the phone to the modem, and then connect the modem to your computer.

2. On the toolbar, click **New Fax.**

3. Follow the instructions in the setup wizard to connect to a fax modem, and then, when you're finished, create your fax.

To connect to a fax server instead of a modem, contact your system administrator. For more help with faxing, click the **Help** button on the toolbar.

SCAN After you add a scanner to your computer, you can preview documents or pictures before you scan them, and then adjust your scan settings for better results. You can also fax or e-mail scanned files to someone else.

To get started:

1. Connect your scanner to your computer by following the instructions that came with your scanner, and then place a document or picture on the scanner.

2. In Windows Fax and Scan, at the bottom of the left pane, click **Scan.**

3. On the toolbar, click **New Scan.**

4. Choose the scan settings you want to use, and you're ready to scan.

Use the options on the toolbar to fax, e-mail, print, or copy scans at any time. For more help with scanning, click the **Help** button on the toolbar.

TEACHER TALK
New Pedagogies for Nursing

Student-Centered Pedagogies: Co-Creating Compelling Experiences Using the New Pedagogies

Nancy Diekelmann, PhD, RN, FAAN, and Susan Lampe, MS, RN

Teachers participating in a substantive study of schools of nursing implementing the new pedagogies (i.e. critical thinking, phenomenological participation, often described as creating new learning experiences with students [Diekelmann, 2001]) New pedagogies provide avenues for both teachers and students to challenge their taken-for-granted assumptions (Diekelmann, 2001; Tanner, 2003) and ways of thinking about nursing education (Benner, 2003). For example, teachers and students commonly assume that the teacher's role is to design, deliver and evaluate learning activities that will prepare students for practice. Further, the extent to which a course is (or is not) compelling is presumed to be the teacher's responsibility. Rarely, teachers and students assume that students lack the expertise and skills and are uninterested in participating in the development of compelling courses. The new pedagogies challenge these teacher-centered assumptions of outcome-based curricula themselves and support the development of student-centered learning experiences.

All of the pedagogies reflect ways of thinking about schooling, learning, and teaching and, as such the changes that occur when they are implemented are difficult to see as they often occur in the thinking that teachers bring to their teaching practice. In the study teachers commonly described how in learning the new pedagogies, their thinking changed and how they attributed changes they were making in their courses not to the use of new strategies but to new ways of thinking. These changes in thinking were commonly revealed in teachers' descriptions of how they spent their time with students and the responsibilities were overlooked in creating compelling courses.

Recentering the Teacher: "Challenging Our Usual Ways of Thinking"

Greta, an experienced nurse, has taught a pediatric nursing course for 3 years. She recounted how learning the new pedagogies challenged her "usual ways of thinking about things and planning. It ran for students." Greta described the day she received initially from a colleague at another pilot site during a teleconference. One of the most helpful ideas came during a teacher teleconference call when I was encouraged by a colleague to identify what to experiential learning the each class experiences. And what to concentrate for me is based on what, students need to know about something in class "to think like a nurse." I have kept that sentence in front of me...so I prepare for each lecture. First I write down what I think is going to be the students to take away from that day's class. Then I read the assigned text to be sure that I have not overlooked anything. Then I go to other sources, like journal articles I have accumulated on that subject and the Internet, to see what current information I might bring to the classroom.

Initially Greta described how, in being encouraged to identify "essential learning" she focuses on learning the conventional strategies with which she is familiar. That is, her attention is focused on answering the content provided in her courses in up to date and reflective of the current literature. This common approach to teacher centered in that it assumes that the role of the teacher is to identify "essential" content and transmit it to students. However embedded in Greta's concept is the importance of engaging teachers in thinking about their teaching. That is although Greta's initial efforts are directed toward improving her use of conventional pedagogy (classroom education), she finds thinking about (deliberating) how she teaches (identifying and presenting essential con-

Chapter 3. Special Characters

What makes a character special? If it has a meaning beyond its literal meaning, a metacharacter. *If it has a special interpretation when used with certain commands and keywords, it may be considered a* whitespace. *Within a context of Bash scripts*

Special Characters Found In Scripts and Elsewhere

#

Comments. Lines beginning with a # (with the exception of #!) are comments and will not be executed.

```
# This line is a comment.
```

Comments may also occur following the end of a command.

```
echo "A comment will follow." # Comment here.
                              # Note the whitespace before #
```

Comments may also follow whitespace at the beginning of a line.

```
    # A comment preceded by whitespace.
```

Comments may even be embedded within a pipe.

```
initial_processing |
# Something else to do.
# Another comment.
final_processing
```

A command may not follow a comment on the same line. There is no method of terminating the comment in order for "live code" to begin on the same line. Use a new line for the next command.

Of course, a quoted or escaped # in an echo statement does not begin a comment. Likewise, # appears in certain parameter substitution constructs and in numerical constant expressions.

```
echo The # here does not begin a comment.
echo The \# here does not begin a comment.
echo The # here begins a comment.

echo ${PATH#*:}       # Parameter substitution, not a comment.
echo $(( 2#101011 ))  # Base conversion, not a comment.

# Thanks, S.C.
```

The standard quoting and escape characters (" ' \) escape the #.

Certain pattern matching operations also use the #.

Command separator [semicolon]. Permits putting two or more commands on the same line.

```
echo hello; echo there

if [ -x "$filename" ]; then    # Note that "if" and "then" need separation.
  echo "File $filename exists."; cp $filename $filename.bak
else
  echo "File $filename not found."; touch $filename
fi; echo "File test complete."
```

Note that the ";" sometimes needs escaping.

PRODUCT OVERVIEW Model # A3708W3C-ELT | Internet # 303439998

No Ductwork No Problem Amvent Ductless (Duct-Free) Mini Split Air Conditioning Systems can be installed in virtually any location. Amvent systems provide high efficiency cooling during the hot summer months, and are far more economical when compared to conventional central air conditioning systems. Ductless Mini Split Air Conditioners are also known as Zone Systems, cooling the zone or area in which they are installed. The system can be turned on or off within the zone to suit use; this capability allows for substantial energy savings. Ductless Mini Split systems have two main components: 1) the indoor unit (Evaporator) 2) and the outdoor unit Condenser). Installation is simple: the indoor unit hangs on a metal bracket (supplied) that attaches to the interior wall, much like a picture frame. A three-inch-wide hole is then drilled through the wall. The line set (refrigerant gas pipes) and communication wires are passed through the hole, connecting the indoor and outdoor units. Main power is supplied to the outdoor unit, powering the entire unit as well. Once installed, the entire system is operated by a wireless remote control (supplied). Just use the remote to set the desired temperature and the system will run maintaining the set comfort level. Amvent Ductless Mini Split Air Conditioning Systems are designed to be easy to use and install, durable, economical, and versatile while providing an effective and reliable solution for your comfort and elegance.

- Area coverage: up to 640 sq. ft.
- Capacity: 12,000 BTU (1 ton) high efficiency cooling
- Efficiency rating: high efficiency (SEER 13.8)
- Power requirements: 110-Volt/60Hz, single phase - indoor unit powers outdoor system
- Main functions: cooling/independent dehumidification
- Refrigerant: pre-charged with environmentally-friendly DuPont R410A refrigerant gas (no additional charging required)
- Line set: 9.8ft ft. (3 meters) of insulated copper piping, pre-flared/pre-flanged

ONE-LINERS: BUMPER STICKERS

~ Rock is dead. Long live paper and scissors.
~ The last thing I want to do is hurt you. But it's still on the list.
~ In America anyone can be president. That's one of the risks you take.
~ Life would be easier if I had the source code.
~ If at first you don't succeed, call it version 1.0
~ There are 10 types of people in the world. Those who understand binary, and those who don't.
~ Time is nature's way of keeping everything from happening all at once.
~ If you're not part of the solution, you're part of the precipitate.
~ I think, therefore I'm dangerous.
~ Under Capitalism, man exploits man. Under Socialism it's the other way around.
~ Actions speak louder than bumper-stickers.

Engineering classes at the University of Maryland are tough, and struggling students sometimes go to extremes in order to pass. Grading exams one semester, I got to this question: "What is the relationship between kinetic and potential energy?"

One student, obviously stumped, decided to get clever and wrote, "As far as I know, they're just friends, but there could be something else going on there."

A minister and lawyer were chatting at a party.
"What do you do if you make a mistake on a case?" the minister asked.
"Try to fix it if it's big; ignore it if it's insignificant," replied the lawyer. "What do you do?"

The minister replied..."Oh, more or less the same. Let me give you an example. The other day I meant to say 'the devil is the father of liars,' but instead I said 'the devil is the father of lawyers.' so I let it go."

The Reverend Douglas Johnston was not the best of drivers. One Sunday he was driving home from church when unfortunately, he had a minor bump with cyclist. The poor man was knocked off his bike into the ditch. The Vicar naturally stopped his car, got out and profusely apologized and gave the cyclist his calling card saying that if he could ever be of help, then the man should not hesitate to ask.

As the man rode home he looked at the card which said, 'The Reverend Douglas Johnston is sorry he missed you today.'

The New York Times, among other papers, recently published a new Hubble photograph of distant galaxies colliding. Of course, astronomers have had pictures of colliding galaxies for quite some time now, but with the vastly improved resolution provided by the Hubble Space Telescope, you can actually see the lawyers rushing to the scene.

TODAY IN TRIVIA. When was Popeye's first film appearance? Popeyes first appearance on film was in a 1933 Betty Boop Paramount cartoon called Popeye the Sailor.

VAZING PROBLEMS.

[redacted]

Is there any way to get more visible information on the Unscheduled Work Order part of the dispatch board? NO

Why does it take so long for the database to find an item once it has been input into the system? After an item is put into the system it takes forever to apply that item to a work order Searches don't work well either ? - SEE SAM

- How do I elim nate extra customers in our data base? We should only have 12 or so clients, but we have tons

What changed on Tuesday evening?

Multiple Technicians par One Work Order

1) Issues with closing out individual scopes of work Status and Sub status
2) Issues with timing job from duration and calendar vs technician calendar

- Ok, so I can t appoint a technician to a job without defining the hourly scope of his, or her portion of the project How do we resolve this?

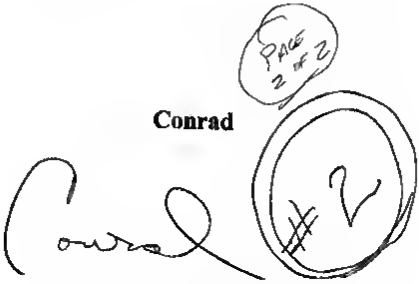
HI PETER

Did you receive this fax???????



Hail Mary:

Today begins the 90th Anniversary of the apparition of the Virgin of Fatima :

When you receive this email say a Hail Mary and ask for a special favor.

"Hail Mary, full of grace. The Lord is with thee. Blessed art thou among women and blessed is the fruit of thy womb, Jesus. Holy Mary, Mother of God, pray for us sinners, now and at the hour of our death, Amen.? (your request)

Please do not break the Novena , send it to 12 people you think deserve justice, peace, love, health, prosperity and truth. When you are down to nothing, God is up to something. This has been traveling since 5/13/07!

Crab Cake Phyllo Cups with Spicy Remoulade

These tasty mini crab cakes pack a punch with every bite and are sure to be a hit at your holiday soiree!

★★★★★ [illegible]

Ingredients

CRAB CAKE PHYLLO CUPS WITH SPICY REMOULADE

- 30 mini phyllo shells
- 1 pound Lump crabmeat, picked through*
- 2 tablespoons mayonnaise
- 2 teaspoons seafood seasoning
- 2 tablespoons chives, finely chopped

SPICY REMOULADE

- 1 cup mayonnaise
- ¼ cup whole grain mustard
- 1 tablespoon hot sauce
- 2 teaspoons Worcestershire sauce
- 2 teaspoons ketchup
- 2 dashes hot sauce
- ¼ cup pickle juice
- 2 tablespoons capers, drained and chopped
- 1 clove garlic, grated
- ½ lemon, juiced
- 2 tablespoons capers, drained and chopped
- salt and freshly ground black pepper to taste

step-by-step directions

1. Preheat oven to 350°F. Spray 2 mini cupcake tins with non-stick cooking spray. Fill the tins with mini phyllo cups. Set aside.
2. In a large bowl, fold the lump crab meat, mayonnaise, seafood seasoning and chives until just combined. Place crab cake with the crab mixture. Place in the oven to bake for 10-12 minutes. Remove from the oven to cool. Serve warm or at room temperature, topped with a small dollop of spicy Remoulade sauce.
3. For the Spicy Remoulade Sauce:
4. Combine all the ingredients for the Remoulade sauce in a medium bowl. Season with salt and pepper to taste.

tips

Make the remoulade sauce in advance and store in the fridge. Make extra and serve with hot dogs, no joke, be grateful.

SERVICE & SUPPORT

Testing Your Fax Machine

After you have connected the fax machine to your telephone line, you can now test to see if is ready to send and receive faxes.

Here's how:

1. Program your full 10-digit fax number into your fax machine.
2. Send a test fax to 1-855-FX-CANON (1-855-392-2666).
3. Once our service receives your fax, a test page will be sent back to the fax number programmed into your machine. This process generally takes 2 to 3 minutes.

Of course, should you need assistance setting up your fax or with any of the steps above, we are here to help. Please refer to our online Knowledge Base / FAQs, Contact Us by Phone or Send Us an Email.

HOW TO INSTALL WALL THERMOSTATS

If you think of a thermostat as a light switch that turns on and off automatically, it may be easier to understand its application and installation. There are two basic types of line voltage thermostats. The single pole thermostat switches only one side of the line serving the heater. The double pole switches one side of the line to maintain correct temperature and both sides when the control is turned to its off position. Most good thermostats have a 22 amp rating and will handle up to 5,000 watts of heat. If over 5,000 watts are needed to heat a single room we recommend using a low voltage thermostat with heat circuit relays. This method maintains the most even room temperatures and balances the work load between the heaters.

[2] Circle the minor's name and furnish the minor's SSN.

You must provide your individual name. If you also enter your business or DBA name on the "Business name/disregarded entity" name line. You may enter your business or DBA name on the first line. If you do not enter a name, you may enter your business or DBA name on the second line.

If you have neither the name of the trust, estate, or pension trust, but no name, the first line should be left blank. Check the appropriate box for the type of entity. Also see *Special rules for partnerships* on page 3.

Note. If the grantor also enters a name, the IRS may issue a Form 1099 to the grantor and also to the trust.

Caution. If the account is in more than one name, the person who is listed first will be considered the owner for the purposes of backup withholding.

Secure Your Tax Records from Identity Theft

Identity theft occurs when someone uses your personal information such as your name, SSN, or other identifying information, without your permission, to commit fraud or other crimes. An identity thief may use your SSN to get a job or may file a tax return using your SSN to receive a refund.

To reduce your risk:

- Protect your SSN
- Ensure your employer is protecting your SSN, and
- Be careful when choosing a tax preparer.

If your tax records are affected by identity theft and you receive a notice from the IRS, respond right away to the name and phone number printed on the IRS notice or letter.

If your tax records are not currently affected by identity theft but you think you are at risk due to a lost or stolen purse or wallet, questionable credit card activity or credit report, contact the IRS Identity Theft Hotline at 1-800-908-4490 or submit Form 14039.

For more information, see Publication 4535, Identity Theft Prevention and Victim Assistance.

Victims of identity theft who are experiencing economic harm or a system problem, or are seeking help in resolving tax problems that have not been resolved through normal channels, may be eligible for Taxpayer Advocate Service (TAS) assistance. You can reach TAS by calling the TAS toll-free case assistance at 1-877-777-4778 or TTY/TDD 1-800-829-4059.

Protect yourself from information misuse or receiving scheme. Phishing is the creation and use of email and websites designed to mimic legitimate business emails and websites. The most common act is sending an email to a user falsely claiming to be an established legitimate enterprise in an attempt to scam the user into surrendering private information that will be used for identity theft.

The IRS does not initiate contacts with taxpayers via emails. Also, the IRS does not request personal detailed information through email or ask taxpayers for the PIN numbers, passwords, or similar secret access information for their credit card, bank, or other financial accounts.

If you receive an unsolicited email claiming to be from the IRS, forward this message to phishing@irs.gov. You may also report misuse of the IRS name, logo, or other IRS property to the Treasury Inspector General for Tax Administration (TIGTA) at 1-800-366-4484. You can forward spam that claims to be from the Federal Trade Commission, an identity theft agency, or a company to spam@uce.gov or report it at www.ftc.gov/idtheft or 877-438-4338.

Visit IRS.gov to learn more about identity theft and how to report it.

Privacy Act Notice

Section 6109 of the Internal Revenue Code requires you to identify your status to IRS for persons (including federal agencies) who are required to file information returns with the IRS to report interest, dividends, or certain other income paid to you; mortgage interest you paid; the acquisition or abandonment of secured property; the cancellation of debt; or contributions you made to an IRA. Archer MSA, or HSA. The person collecting this form uses the information on the form to file information returns with the IRS, reporting the above information. Routine uses of this information include giving it to the Department of Justice for civil and criminal litigation and all cities, states, the District of Columbia, and U.S. commonwealths and possessions for use in administering their laws. The information may also be disclosed to other business center a treaty or federal and state agencies to enforce civil and criminal laws, or to federal law enforcement and intelligence agencies to combat terrorism. You must provide your TIN whether or not you are required to file a tax return. Under section 3406, payers must generally withhold a percentage of interest, interest, dividend, and certain other payments to a payee who does not give a TIN to the payer. Certain penalties may also apply for providing false or fraudulent information.

3. **Open Value Subscription** – Microsoft Volume Licensing program designed for businesses with between 2 and 250 computers that are looking to take advantage of the various benefits of Microsoft's Software Assurance offerings (Like Upgrade protection, Home Use Rights, Spread Payments, eLearning, etc.) in addition to the flexibility of subscribing to Microsoft technology instead of purchasing perpetual licenses which provides lower up-front costs flexible license counts per year, and more. It offers the option to subscribe to Licenses with Software Assurance and Upgrades with Software Assurance (Windows Desktop O/S). Offers non-perpetual licenses and is a three year program. Available through any Microsoft reseller. See more online.
4. **Open License for Charities** – Microsoft Volume Licensing program designed for eligible charity organizations (in regions where available) that meet certain requirements in order to be able to purchase licenses through Open License for Charities. Similar program to Open License, however, it offers lower acquisition costs for the included items for qualifying charity organizations. Available only through Authorized Open License for Charities resellers. Offers perpetual licenses and is a two year program. See more online.
5. **Open License for Governments** – Microsoft Volume Licensing program similar to the Open License program, but with different pricing and partner channels. In some regions, government organizations may also participate in the Open Value for Government and Open Value Subscription for Government programs. Available only through Authorized Open License for Government resellers. Offers perpetual licenses and is a two year program. See more online.
6. **Open License for Education** – Microsoft Volume Licensing program designed for eligible academic organizations (in regions where available) that meet certain requirements in order to be able to purchase licenses through Open License for Education. Similar program to Open License, however, it offers lower acquisition costs for the included items for qualifying educational organizations. Offers perpetual licenses and is a two year program. Available only through Authorized Open License for Education resellers. See more online.
    - There are additional licensing options for educational organizations besides Open License for Education so be sure to look online for some of those additional options.

A document that you may find helpful. In addition to the links I have provided above is the Microsoft Volume Licensing Reference Guide that you can download. Hopefully the quick overview above helps give a basic understanding of the what the various Open License Programs available are and will work as a foundation for further Microsoft Open License Basics posts I will be putting up here on the Blog moving forward.

Puff Pastry Apple and Raisin Strudel

Recipe courtesy Dave Lieberman

Prep Time:	20 min	**Level:**	**Serves:**
Inactive Prep Time:	--	Easy	6 to 8 servings
Cook Time:	40 min		

Ingredients

2 large Golden Delicious apples, peeled, cored and sliced 1/8 to 1/4-inch thick
1 lemon, juiced
1 cup raisins
1/4 cup sugar, plus 3 tablespoons
2 tablespoons cold butter, cut into small pieces, plus 2 tablespoons butter, melted
All-purpose flour, for dusting
1 sheet frozen puff pastry, thawed
1 teaspoon ground cinnamon

Directions

Position an oven rack in the center of the oven and preheat to 375 degrees F.

In a medium bowl, toss the sliced apples with the lemon juice until the apples are thoroughly coated. Add the raisins, 1/4 cup sugar, and the 2 tablespoons cold cubed butter and toss well. Set aside.

Lightly dust the counter or work surface with flour. Lay the puff pastry on top and dust the rolling pin with additional flour. Gently roll the puff pastry to 1/8-inch thickness.

Spread the apple and raisin mixture over the bottom half of the puff pastry square leaving about 1-inch of space along the side edges. Fold the top half of the puff pastry over and pinch to seal the edges together.

Brush the entire strudel with the melted butter and then sprinkle with cinnamon and remaining sugar. Using a serrated knife, make 3 diagonal slits across the top of the strudel.

Place the strudel on a parchment lined baking sheet and bake for 40 minutes, rotating halfway through cooking, until the pastry is puffed and golden brown.

Description of Work Performed:

Arrived on site. Located circuit in telecom room tested it and it was up. Calls they are good. Traced each of the two circuits Demarc to the server room, they are patched into ports 639 & 640 on pp then they patch into Cisco Catalyst 3 switches ports 37 on top switch 2 port 39 on bottom switch. Neither run lands in telecom room where the blocks and circuits are. Passed all port info on to Plant manager John & to Hrill at Velocity. Plant manager was able to verify that the phones worked until Dennis IT began work and switch swaps in server room.

KAISER PERMANENTE®
Senior Advantage (HMO)

ELECTION FORM
California Region Plan

Important information about this election form

PLEASE READ ALL PAGES BEFORE SIGNING THIS ELECTION FORM

Please type or print legibly, using a black or blue ballpoint pen, and press firmly.

Completing and returning this election form is your first step to becoming a Kaiser Permanente Senior Advantage member. If you and your spouse are both applying, please fill out this form for yourself and a separate one for your spouse. For assistance completing this election form or if you need information in another language or format (Braille), please contact the Kaiser Permanente Member Service Call Center toll free at 1-800-443-0815 (TTY 1-800-777-1370 for the hearing or speech impaired) seven days a week, from 8 a.m. to 8 p.m.

- You are entering into an important agreement, governed by specific Medicare and Kaiser Permanente rules explained further on. Your signature on this election form signifies that you have read, understand, and agree to these provisions. Kaiser Permanente is a Medicare Advantage organization with a Medicare contract.
- You will need to provide us with verification that you are entitled to Medicare Part A and enrolled in Medicare Part B (or for group members enrolled in Medicare Part B only) and you must live inside our Kaiser Permanente Senior Advantage service area for us to enroll you. Please check the zip codes listed in the *Evidence of Coverage* to be sure you qualify for enrollment.
- If you have end-stage renal (kidney) disease (ESRD), you may not become a member of Senior Advantage unless one of the following is also true:
  - You were diagnosed with ESRD while you were already a Kaiser Permanente member in the California region, and you are enrolling during an allowable election period. To be eligible there must be no break in coverage between your current Kaiser Permanente coverage and the start of your coverage in Kaiser Permanente's Senior Advantage Plan.
  - You were in a Medicare Advantage (or Medicare+Choice) plan that left the Medicare program or stopped providing coverage in your area on or after December 31, 1998, and you have not yet used your one-time enrollment exception to enroll in a Medicare health plan.
  - You have had a successful kidney transplant and you attach a note or records from your doctor showing that you have had a kidney transplant and no longer need regular dialysis.
  - You belong to an employer group or union/trust fund plan who term-dated their contract with another insurer and selected Kaiser Permanente as a plan option for their employees.

ABOUT THE ENROLLMENT PROCESS
Submitting your election form

- After completing pages 1–3 of this election form, please read the sections titled "Release of Information" and "Conditions of Election" at the end of this form. Then sign and date page 3.
- Please keep the bottom white copy of this election form for your records. If required, send the middle yellow copy to your employer group or union/trust fund. Return the top signed white copy in the enclosed postage-paid envelope to:

  Kaiser Permanente – Medicare Unit
  PO Box 232400
  San Diego, CA 92193-2400

- When we receive your election form, we will screen it for completeness and signatures and we will then acknowledge receipt by mail.
- We will notify Medicare that you have applied to join Kaiser Permanente Senior Advantage.
- Within 10 calendar days after Medicare confirms your eligibility, we will confirm the effective date of your coverage.
- You may receive a Kaiser Permanente ID card and information for new members.

HERE IS WHAT U SENT ME

NOT ME!

Mr. Bennett,

Thank you for alerting us with the problems you encountered while staying at Americas Best Value Inn in Ironwood.

I do sincerely apologize for the inconvenience you encountered while you were here. We are having issues with our hot water heater and are having this looked at and hopefully taken care of soon. I apologize for the loud neighbors you were roomed next to and am glad the staff tryed to fix that problem.

I can assure you that I was not behind the desk in non-professional attire and I will review our policy with the appropriate people and I'm sure it will improve.

Again I do apologize for any inconvenience you encoutered while staying with us, I will be mailing you a certificate for a free night stay. We appreciate your business and again we are truley sorry.

Testing Your HP Fax Machine with the HP Fax Test Service

Introduction

This document will assist you in testing your HP fax machine using the HP Fax Test service. Over time, this document may be updated by clicking the **Printable Version** link in the upper right corner of the page.

Test your fax machine

Before using the HP Fax Test service, follow the instructions below for:

- Verifying that your phone number is set up correctly
- Making sure the fax cable is connected properly
- Making sure the fax is not busy with another call
- Making sure the fax is not busy receiving a fax
- Making sure the fax is not busy sending a fax
- Making sure the fax is not busy printing a fax
- Making sure the fax is not busy copying a fax
- Making sure the fax is not busy scanning a fax
- Making sure the fax is not busy faxing voice mail, call blocking, or call privacy features.

NOTE: If you want to make sure that your fax machine is working correctly, you can perform a test fax. This way, you can see exactly what will happen when you send a fax. If the test fax fails, you can see exactly where it fails. This will help you troubleshoot the problem. For more information about troubleshooting, see the HP Fax Troubleshooting Guide. If you want to send a test fax, see the HP Fax Test Guide.

1. Send a test page (black and white text) to the HP fax test service (1-650-857-1501).
2. When your fax is received by the HP Fax Test Service, we will generate a report for you within five minutes. Printing this report confirms that your fax machine is working correctly.

If you do not receive your report within 5 minutes, there may be a problem with the setup of your fax machine. Consult the user manual that came with the product for proper setup and configuration.

NOTE: The most common cause of failure is that the fax number with the HP Fax Test service does not match the number of the phone line connected to the fax. Also, ensure that the fax line does not contain the following number of devices: only one telephone number including the one in use.

For more information, see the Contact HP section at the top of this page.

Welcome to

Windows® Fax and Scan

Use your computer to send and receive faxes and to scan documents

FAX You can send and receive faxes on your computer without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started:

1. Connect a fax device to your computer.

   If your computer needs an external modem, connect the power cord to the modem and then connect the modem to your computer.

2. On the taskbar, click **New Fax**.

3. Follow the onscreen instructions to set up the fax modem and then when you're ready, create your fax.

To connect a fax device that isn't a modem, consult your documentation for more help with setup. Click the **Help** button on the toolbar.

SCAN After you add a scanner to your computer, you can preview documents or pictures before you scan them, and then adjust your scan settings for better results. You can also fax or e-mail scanned files to someone else.

To get started:

1. Connect your scanner to your computer by following the instructions that came with your scanner, and then place a document or picture on the scanner.

2. In Windows Fax and Scan, on the toolbar near the top of the window, click **Scan**.

3. On the taskbar, click **New Scan**.

4. Choose the scanner that you want to use, and then follow the prompts to scan.

Use the options on the toolbar to fax, e-mail, print, or copy your scanned image. For more help with scanning, click the **Help** button on the toolbar.

Our Father which art in heaven
hallowed be thy name
thy kingdom come,
thy will be done,
on earth as it is in heaven
Give us this day our daily bread
And forgive us our trespasses
as we forgive them that trespass against us
And lead us not into temptation
but deliver us from evil
[For thine is the kingdom,
the power and the glory
for ever and ever.]

Just a closer walk with Thee,
Grant it, Jesus, is my plea,
Daily walking close to Thee,
Let it be, dear Lord, let it be.

I me weak, but Thou art strong,
Jesus, keep me from all wrong,
I'll be satisfied as long
As I walk, let me walk close to Thee.

Through this world of toil and snares,
If I falter, Lord, who cares?
Who with me my burden shares?
None but Thee, dear Lord, none but Thee.

When my feeble life is o'er,
Time for me will be no more,
Guide me gently, safely o'er
To Thy kingdom, dear Lord, to Thy shore.

I me weak, but Thou art strong;
Jesus, keep me from all wrong;
I'll be satisfied as long
As I walk, let me walk close to Thee.

4. Perform your role for a den meeting or pack program.

Paws on the Path

Complete requirements 1–5. Requirements 6 and 7 are optional.

Requirement

1. Show you are prepared to hike safely in any outdoor setting by putting together the Cub Scout Six Essentials to take along on your hike.
2. Tell what the buddy system is and why we always use it in Cub Scouting. Describe what you should do if you get separated from your group while hiking.
3. Choose the appropriate clothing to wear on your hike based on the expected seasons.
4. While hiking, recite the Outdoor Code and the Leave No Trace Principles for Kids with your leader. (This may be combined with requirement 3 of the Call of the Wild adventure.) After hiking, discuss how you showed respect for wildlife.
5. Go on a 1-mile hike with your pack buddy. Find two interesting things that you've never seen before and respect with your den or family.
6. Name two birds, two insects, and/or two other animals that live in your area. Explain how you identified them.
7. Look a map of an area near where you live using common map symbols. Show which directions is north on your map.

Running With the Pack

Complete the following requirements.

Requirement

1. Play catch with someone in your pack or family who is standing 5 steps away from you. Play until you can throw and catch successfully at this distance. Take a step back and see if you can animate your throwing and catching skills.
2. Practice balancing as you walk forward, backward, and sideways.
3. Measure flexibility and balance by doing a front roll, a back roll, and a frog stand.
4. Play a sport or game with your pack or family and show good sportsmanship.
5. Do at least two of the following: frog leap, inchworm walk, kangaroo hop, or crab walk.

Typical structure for research journal articles

1. Conceptualization/Introduction

- **literature review**
  - what is already known about this issue?
  - research gap – what is not known
- **research question/hypothesis**
  - what do the authors want to know?
  - why is this a useful question?
- **research warrant (so what??)**
  - how will speculation about this question contribute to understandings of this issue?

2. Method

- **data collection**
  - describe demographics of sample group – who was studied?
- **method**
  - describe **specifically** how the authors tried to answer the research question or prove the hypothesis wrong
  - what method family was used?
    - experimental
    - survey
    - textual analysis
    - ethnography/performance

3. Analysis

- **explain what the authors did to the data to make sense of it**
  - statistical analysis
  - rhetorical methods
  - qualitative and schematic (most arbitrary)
- **draw conclusions** – what did the authors conclude?

4. Discussion/Conclusion

- **link conclusions to question/hypotheses**
- **contribution to body of knowledge (so what??)**
  - implications for these findings?
- **project limitations**
  - what would have others do differently next time?
- **directions for future research**
  - how might someone else continue this line of investigation?
  - what needs to be done next?

CUSTOMER DECLARATION

I/We/we and all of the undersigned, hereinafter and collectively referred to as "the Customer", have read and understood the General Agreement for the Banking Agreement and other Documentation relating to this business and have agreed to be bound by the terms thereof including, without limitation, those clauses that contemplate fees, the payment of interest and/or to the Banking Agreement.

Anti-Money Laundering and Anti-Terrorist Financing Legislation: I/We/we acknowledge that pursuant to the Banking Agreement for this account, I/we/we have provided or will provide to the Bank all information and documentation that the Bank requires in order to comply with all applicable anti-money laundering and anti-terrorist financing legislation, including, without limitation, the Proceeds of Crime (Money Laundering) and Terrorist Financing Act (Canada) and the regulations made thereunder (collectively, the "PCMLTFA"). I/We/we have read and understood the Bank's policies and procedures with respect to the PCMLTFA and the Bank's Anti-Money Laundering and Anti-Terrorist Financing Policy (collectively, the "AML Policy"). I/We/we acknowledge that the Bank may, in its sole discretion, refuse to open an account for me/us or refuse to process any transaction for me/us if I/we/we do not provide the Bank with all information and documentation that the Bank requires in order to comply with the PCMLTFA and the AML Policy. I/We/we acknowledge that the Bank may, in its sole discretion, close my/our account if I/we/we do not provide the Bank with all information and documentation that the Bank requires in order to comply with the PCMLTFA and the AML Policy.

Wire Transfer Policy: Personal information is required by the Agreement, Instructions and Authorities and the Banking Agreement for the purpose of, among other things, any wire transfer, and I/we/we acknowledge and consent to such personal information being provided to the Bank and to any of its affiliates, subsidiaries, agents, service providers and any other persons, including, without limitation, any regulatory authority, any law enforcement agencies, the beneficiary, financial institutions and agents of each, to facilitate the funds transfer service and processing. I/We/we acknowledge that I/we/we have read and understood the Bank's Wire Transfer Policy (the "WTP") and I/we/we agree to be bound by the terms thereof. I/We/we acknowledge that the Bank may, in its sole discretion, refuse to open an account for me/us or refuse to process any transaction for me/us if I/we/we do not provide the Bank with all information and documentation that the Bank requires in order to comply with the WTP. I/We/we acknowledge that the Bank may, in its sole discretion, close my/our account if I/we/we do not provide the Bank with all information and documentation that the Bank requires in order to comply with the WTP. I/We/we acknowledge that the Bank may, in its sole discretion, refuse to open an account for me/us or refuse to process any transaction for me/us if I/we/we do not provide the Bank with all information and documentation that the Bank requires in order to comply with the WTP. I/We/we acknowledge that the Bank may, in its sole discretion, close my/our account if I/we/we do not provide the Bank with all information and documentation that the Bank requires in order to comply with the WTP.

I/We/we acknowledge that the Bank may, in its sole discretion, refuse to open an account for me/us or refuse to process any transaction for me/us if I/we/we do not provide the Bank with all information and documentation that the Bank requires in order to comply with the WTP. I/We/we acknowledge that the Bank may, in its sole discretion, close my/our account if I/we/we do not provide the Bank with all information and documentation that the Bank requires in order to comply with the WTP.

D. Internal Operating Resistance During Discharge

Figure B (right) shows how the internal resistance of the following cells and batteries changes over a period of discharge. Similar profiles will likely be seen with other cell sizes. The typical initial IR4+ AC internal resistance for each cell size is shown in *Figure C*.

Internal Resistance and CCV of BR1225 Cell During 30KΩ Discharge

E. Operating & Storage Temperature Range

Rayovac® BR Lithium coin cells and the batteries provide excellent performance over a wide range of temperatures. The operating and storage temperature ranges are:

BR Lithium Coin Cells	0°C to +60°C (40°F to +85°F)
PR Batteries	-18°C to +60°C (-4°F to +212°F)

F. Safety

Figure D below compares the safety of the three most common Lithium systems. This figure demonstrates that the Rayovac BR Lithium battery components are extremely safe.

Rayovac® BR Lithium Batteries have been granted U.L. Component Recognition (Files: MH12342). The battery's composition is also Lithium metallic and thermally stable before, during and after discharge. There is no free liquid electrolyte and non-corrosive.

RECOGNIZED UNDER THE COMPONENT PROGRAM OF UNDERWRITERS LABORATORIES® INC.

'We don't hold anything back'

Ms. Mae's r

Economists fear that as Uptown d

By Helen Cox
The Uptown writer

The Uptown drinking community was recently knocked off its axis when one small sign announced that one of the diverse, finest, cheapest bars in town is now under new management.

"Welcome to Mae, We're Super Classy Now" proclaimed a banner hanging on the still-dilapidated outside wall of "Ms. Mae's" at Magazine and Napoleon streets.

Drink prices have skyrocketed 100 percent to 200 percent since the new management took over. "Why just a few months ago you'd only pay $2 for a double ($1 singles)," drunkenly outraged patron Jack Odell said. "Now it's 3 bucks ($2 single)! Who the hell can afford that? I'm boycotting. I tell you! Boycotting!"

Odell, who was complaining at the bar the next morning, was not the only patron upset about the changes to the establishment famous for its outrageously inexpensive drinks drunken barfights, and dismal intense decor job.

Tulane finance major Kamilla Hurst predicted that, "Raising drink prices such as those at Ms. Mae will serve a direct and crippling blow to the Uptown and, consequently, the national economy buster. Next they'll expect us to tip the bartender after every drink! Who do these people think they are?"

The new owners are fearless that the increase will cause drinkers to resort to bootlegging their own alcohol and raiding their rowdier antics into the streets instead of paying for the one-drink minimums

How Can I Test My Fax Machine?
I just hooked up a new fax machine, and I'd like to test it, just to make sure it works. How can I do that?

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1 855 330-1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZaro... this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both:

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll free number in the United States.) When it's finished transmitting, point your web browser to Fax.Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. This site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

Abstract

Go to:

The use of water for various treatments (hydrotherapy) is probably as old as mankind. Hydrotherapy is one of the basic methods of treatment widely used in the system of natural medicine, which is also called as water therapy aquatic therapy pool therapy and balneotherapy. Use of water in various forms and in various temperatures can produce different effects on different system of the body. Many studies/reviews reported the effects of hydrotherapy only on very few systems and there is lack of studies/reviews in reporting the evidence-based effects of hydrotherapy on various systems. We performed PubMed and PubMed central search to review relevant articles in English literature based on "effects of hydrotherapy/balneotherapy" on various systems of the body. Based on the available literature this review suggests that the hydrotherapy has a scientific evidence-based effect on various systems of the body.

Keywords: Evidence-based effects, Hydrotherapy, Various systems

Introduction

Go to:

Hydrotherapy is the external or internal use of water in any of its forms (water ice, steam) for health promotion or treatment of various ailments with various temperatures, pressure, duration, and site. It is one of the naturopathic treatment modality used widely in ancient cultures including India, Egypt, China, etc.[1] Though many countries used water to produce different physiological/therapeutic effects on different part of the system for maintaining health, preventing, and treating the diseases, the scientific evidence-based effects are not well documented. There are many studies/reviews that reported either physiological or therapeutic or combination of both the effects of hydrotherapy on particular system but did not report at all the major systems of the body which made us to do this review with the aim and objective to report scientific evidenced-based effects of hydrotherapy on various systems of the body. In order to provide a general overview we performed PubMed and PubMed central search to review relevant articles in English literature based on "effects of hydrotherapy/balneotherapy" on various systems of the body. Articles published from 1986 to 2012 were included in this review.

Hello!

This is a sample test file which is being sent to you as per your request via the Interpage FreeFax(sm) Service!

This service is intended to provide a preliminary evaluation as to the quality and timeliness of Interpage's subscription fax service(s).

If you review the cover sheet which was transmitted with this fax, you will note the first letter of the name you had indicated in the TO field of the FreeFax request page. This letter serves to correlate the fax request which you had sent with the trial fax transmission result.

This file is a sample MS Word file; many other file types are supported

If you have any questions regarding Interpage's OutFax(sm) Service, including the FaxUnlimited(sm) service with no-per or per-minute charges, please feel free to contact us at:

Phone: +1 (510) 315-2750 9AM to 5:30 PM M-F Pacific Time

E-Mail: ins-support@interpage.net

Web: http://www.interpage.net

Thank you for your interest!

Notes: 1. Due to the malicious use of the FreeFax service, Interpage will no longer transmit personalized text messages; only the above fixed sample message will be transmitted. You may establish a trial account for evaluative purposes by filling out the form located at *http://www.interpage.net/subfax-ins.html*, omitting any billing information, and clearly indicating a valid e-mail address and contact telephone number. Please call (510) 315-2750 for additional details.

2. This fax is not a solicitation nor is it an offer. It was sent by a visitor to interpage's web site who entered your destination number as a recipient of this test fax. A single destination may not receive more than two tests in a given week, however. If you find that someone is sending you faxes in a continuous and abusive manner, please call us at (510) 315-2750 and we will block your fax number from the FreeFax service.

CONCEPTS & MECHANICS OF EXCHANGES

By

Danny C. Santucci

The author is not engaged by this text, any accompanying electronic media or lecture in the rendering of legal, tax, accounting or similar professional services. While the legal, tax, and accounting issues discussed in this material have been reviewed with sources believed to be reliable, concepts discussed can be affected by changes in the law or in the interpretation of such laws since this text was printed. For that reason, the accuracy and completeness of this information and the author's opinions based thereon cannot be guaranteed. In addition, state or local tax laws and procedural rules may have a material impact on the general discussion. As a result, the strategies suggested may not be suitable for every individual. Before taking any action, all references and citations should be checked and updated accordingly.

This publication is designed to provide accurate and authoritative information in regard to the subject matter covered. It is sold with the understanding that the publisher is not engaged in rendering legal, accounting, or other professional service. If legal advice or other expert advice is required, the services of a competent professional person should be sought.

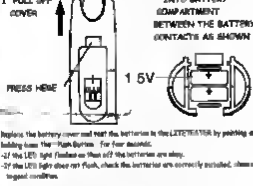
INSTALLING THE BATTERIES



3. Replace the battery cover and test the batteries in the LITETESTER by pushing and holding down the "Push Button" for four seconds.
   - If the LED light flashes on then off the batteries are okay.
   - If the LED light does not flash, check the batteries are correctly installed, clean and inspect contacts.

LITETESTER INSTRUCTIONS

1. Turn the batteries in the LITETESTER, by pressing and holding the "Push" sound for test seconds.
   If the LED light flashes on then off go to step 2.
   If the LED light does not flash, check that the batteries are correctly installed.
2. Plug-in your light string. Hold the connector end (with metal pins) of the LITETESTER against the wire coming out of the plug in the wall (see diagram on back of card), be sure to test the wire 5-6 inches away from the plug. Press and hold down the "Push Button" on the LITETESTER.
   If the LED light on the LITETESTER glows steadily continue to step 3
   If the LED light flashes on then off check the fuse inside the plug. Proceed to the section "Fuse Saver" instructions.
3. To test your light string, count the number of sets that make up your light string and proceed to the corresponding section.

TWO WIRE LIGHT STRINGS

(Also known as Plug-In Sets)

1. Remove the Two bulbs at the end of the Light String (bulbs furthest from the plug). Test both bulbs on the bulb Tester (See Bulb Tester Instructions) If either of these bulbs are faulty replace these two bulbs with new ones
   If the light string still does light remove just the very last bulb on the string and go to Step #2.
2. Move to the bulb furthest away from the plug. (Never this will be the second to the last bulb as you removed the last bulb in Step #1)
   Hold the LITETESTER, pointing the sensor end at the top 1/3 of the bulb.
   Please note: Do not hold the LITETESTER up to the plastic base and do not hold your finger behind the bulb (See Diagram 2 on back of card).
   Press and hold the "Push Button" for four counted
   If the LED (light flashes on then off go to Step #3
   If the LED light glows steadily then reverse the bulb string plug in the wall (See Diagram 3 on back of card) Then repeat the step (LED light on LITETESTER should now flash on then off).
3. Start testing every bulb from the last bulb furthest from the plug, coming towards the plug (Note: this will be the second to the last bulb as you removed the last bulb in Step #1).
   When the LED light on the LITETESTER starts to glow steadily you have contact problem area. (Note remember to test the top 1/3 of the bulb and not the plastic base).
4. When the LED light glows steadily you have reached your problem bone
   Replace the bulb you are at as well as the two bulbs back reached the end of the string furthest from the plug.
5. After changing the bulbs (and re-inserting the very end bulb that you removed in Step #1), the light string should immediately light up. If it does not Then Start at Step #1 of this section again, and repeat until all bulbs/bulb are found.

THREE WIRE LIGHT STRING

(Also known as an End-To-End String)

1. Move to the last bulb at the light string (furthest away from plug). Hold the LITETESTER, steadily the sensor end on the top 1/3 of the bulb. Please Note: Do not hold LITETESTER up to the plastic base and do not hold your finger behind the bulb (See Diagram 2 on back of card)
   Press and hold down the "Push Button" for four counted
   If the LED light flashes on and then off go to Step #2.
   If the LED light glows steadily then reverse the light string plug at the end (See Diagram 3 on back of card). Then **repeat this step** (LED light on LITETESTER should now flash on then off).
2. Start testing every bulb starting from the last bulb furthest from the plug moving towards the plug.
   When you reach a bulb where the LED bulb glows steadily you have located a trouble spot (remember to test the bulb and not the plastic base).
3. When the LED light glows steadily you have reached a bulb that is not making contact change the bulb and also Wobble, on either side of that bulb (See Diagram 4 on back of card).
4. After changing the bulbs, if the light string does not immediately light up. Start again at Step #2 and repeat the test (the test have to repeated as many times as more than one set bulb on the light string).

Troubleshooting Steps

The steps below will help you resolve common faxing problems.

- Switch off fax machine and unplug power adapter from device and from wall outlet. Let fax machine remain off for 30 seconds.
- Try a different phone cord between the fax machine and the Vonage device.
- Eliminate any splitters between the fax machine and the Vonage device.
- Connect Fax machine directly to the Vonage device, bypassing any home wiring.
- If using an All-In-One device, temporarily disconnect device from PC.

RUT-50 Private Party Vehicle Use Tax Chart for 2012

Effective January 1, 2012, through December 31, 2012

The purchase price (or fair market value) of a vehicle determines which tax table to use. The purchase price is the dollar value given for a vehicle and may be in the form of money, credit, property, or services. When there is no stated purchase price, such as in the case of a gift or even trade, the fair market value should be used. The fair market value may be obtained from a licensed dealer.

Note: A trade-in deduction is not allowed on this tax.

Table A

Use the table below when the purchase price (or fair market value) of a vehicle is **less than $15,000**. The tax due is determined by the model year of the vehicle.

Model year	Vehicle age (years)	Tax due ($)
2011 or newer	1 or newer	360
2010	2	290
2009	3	215
2008	4	165
2007	5	115
2006	6	80
2005	7	60
2004	8	45
2003	9	30
2002	10	20
2001	11 or older	20

Table B

Use the table below when the purchase price (or fair market value) of a vehicle is **$15,000 or more**. The tax due is determined by the purchase price (or fair market value) of the vehicle.

Purchase price (or fair market value) ($)	Tax due ($)
15,000 to 19,999.99	750
20,000 to 24,999.99	1,000
25,000 to 29,999.99	1,250
30,000 or more	1,500

Other transaction types that may be reported on RUT-50 are listed below along with the required tax amount.

Exemptions

If one of the following exemptions apply, **the tax due is $0**.

- purchaser is a tax exempt organization
- vehicle is a farm implement primarily used on private farm agriculture and not required to be registered under the Illinois Vehicle Code or a ready-mix concrete truck that is not used under the manufacturing machinery and equipment exemption
- vehicle is used for hauling stock
- purchaser was an out-of-state resident and vehicle was used outside of Illinois for at least three months (individuals only)
- vehicle is an estate gift to a surviving spouse

Exceptions

If one of the following exceptions apply, **the tax due is $15**.

- vehicle is an estate gift to a beneficiary other than a surviving spouse
- vehicle is being transferred in a business reorganization
- vehicle is being transferred or purchased from a spouse, parent, brother, sister, or child

Motorcycles or ATVs

If the purchase is a motorcycle, motor-driven cycle, 3- or 4-wheel all-terrain vehicle (ATV), or motorized pedalcycle, **the tax due is $25**.

Helloween or **Hellowe'en** (a contraction of All Hallows' Evening)[1] also known as **Allhalloween**,[2] **All Hallows' Eve**,[3] or **All Saints' Eve**,[4] is a celebration observed in a number of countries on 31 October, the eve of the Western Christian feast of All Hallows' Day. It begins the three-day observance of Allhallowtide,[5] the time in the liturgical year dedicated to remembering the dead, including saints (hallows), martyrs, and all the faithful departed.[6]

It is widely believed that many Halloween traditions originated from Celtic harvest festivals which may have pagan roots, particularly the Gaelic festival Samhain, and that this festival was Christianized as Halloween.[7][8][9][10] Some academics, however, support the view that Halloween began independently as a solely Christian holy day.[11][12][13]

Halloween activities include trick-or-treating (or the related guising), attending Halloween costume parties, decorating, carving pumpkins into jack-o'-lanterns, lighting bonfires, apple bobbing and divination games, playing pranks, visiting haunted attractions, telling scary stories and watching horror films. In many parts of the world, the Christian religious observances of All Hallows' Eve, including attending church services and lighting candles on the graves of the dead, remain popular,[14][15] although elsewhere it is a more commercial and secular celebration.[16][17] Some Christians historically abstained from meat on All Hallows' Eve,[18][19] a tradition reflected in the eating of certain foods on this vigil day, including apples, potato pancakes and soul cakes.[20][21][22]

Hello!

This is a sample test file which is being sent to you as per your request via the Interpage FreeFax(sm) Service!

This service is intended to provide a preliminary evaluation as to the quality and timeliness of Interpage's subscription fax service(s).

If you review the cover sheet which was transmitted with this fax, you will note the first letter of the name you had indicated in the TO: field of the FreeFax request page. This letter serves to correlate the fax request which you had sent with this trial fax transmission result.

This file is a sample MS Word file, many other file types are supported

If you have any questions regarding Interpage's OutFax(sm) Service, including the FaxUnlimited(sm) service with no-per or per-minute charges, please feel free to contact us at:

Phone: +1 (510) 315-2750 9AM to 5:30 PM M-F Pacific Time

E-Mail: inst-support@interpage.net

Web: http://www.interpage.net

Thank you for your interest!

Notice: 1. Due to the misuse of the FreeFax service, Interpage will no longer transmit personal one text messages, only the above fixed sample message will be transmitted. You may establish a trial account for evaluation purposes by filling out the form located at http://www.interpage.net/outfax-trial.html, omitting any billing information, and also by including a valid e-mail address and contact telephone number. Please call (510) 315 2750 for additional details.

2. This fax is not a solicitation nor is it an offer. It was sent by a visitor to Interpage's web site who entered your destination number as a recipient of the test fax. A single destination number may not receive more than two trials in a given week, however. If you feel that someone is sending you faxes in a continuous and abusive manner, please call us at (510) 315-2750 and we will block your fax number from the FreeFax service.

The Print Quality Check Sheet

Check that the dotted lines forming the four color blocks are all visible with no gaps.

M C Y BK

This Brother inkjet machine has been finely tuned to provide excellent, accurate and long lasting printed pages when using Genuine Brother ink.

The use of non-Brother inks in this machine may potentially result in inferior output quality and/or machine damage.

Any required repairs for damages proven to result from using non-Brother inks in this machine may not be covered by the original machine limited warranty

We strongly suggest you use only Genuine Brother inks when it is time for you to replace the ink cartridge(s).
